

Troubleshooting

Problem / Symptom	Possible Cause / Solution
Sound is distorted Phono input	Only plug turntables into this input. Do not plug in CD players or other Line Level sources. Turn down the INPUT GAIN CONTROLS.
I hear hum.	Make sure you are using good shielded audio cables. Some less expensive audio cables can be susceptible to hum and interference. Keep your audio cables away from AC power cables and AC transformers. Make sure the mixer is not mounted too close to high power amplifiers or lighting equipment power supplies or ballasts. Make sure your turntables are properly grounded.
I hear feedback.	If you are using a microphone, make sure that you are not too close to the speakers or headphones. If you hear feedback on the phono input, then the turntable may be mounted too close to the speakers. Also, make sure the turntable base is placed on a surface that does not vibrate or resonate easily when the speakers are turned up loudly.

Warranty

This unit has been designed and manufactured using quality components. Therefore, it is warranted to be free from defects in materials (limited as specified below), and workmanship for a period of twelve (12) months from the original purchase date. During this period, all service and parts necessary to repair a defect will be free of charge. This limited warranty applies to mechanical parts which are subject to wear and tear as specified.

- Faders, specified durability: 15,000 cycles
- Pottery potentiometers, specified durability: 15,000 cycles
- Switches, specified durability: 15,000 cycles

Consequently, the parts listed above are warranted to be free from defects in material and workmanship for a period of thirty days (30) days from the original purchase date.
