Thomas Register of American Manufacturers ,2003 Vols for 1970 71 includes manufacturers catalogs **Virtual Optical Comparator** ,2008 The Virtual Optical Comparator VOC was conceived as a result of the limitations of conventional optical comparators and vision systems Piece part designs for mechanisms have started to include precision features on the face of parts that must be viewed using a reflected image rather than a profile shadow The VOC concept uses a computer generated overlay and a digital camera to measure features on a video screen The advantage of this system is superior edge detection compared to traditional systems No vinyl charts are procured or inspected The part size and expensive fixtures are no longer a concern because of the range of the X Y table of the Virtual Optical Comparator Product redesigns require only changes to the CAD image overlays new vinyl charts are not required The inspection process is more ergonomic by allowing the operator to view the part sitting at a desk rather than standing over a 30 inch screen The procurement cost for the VOC will be less than a traditional comparator with a much smaller footprint with less maintenance and energy requirements

Excerpt from The Illustrated Optical Manual Or Handbook of Instructions for the Guidance of Surgeons in Testing Quality and Range of Vision and in Distinguishing and Dealing With Optical Defects in General I have endeavoured to make the present edition of the Optical Manual as complete a guide as possible to the diagnosis and management of optical defects in the hope that it may prove useful as a text book on the subject for civil as well as for military surgeons In the former editions the necessities of military practice were almost exclusively kept in view but in the present revised and illustrated edition while bringing the text up to date in respect to the visual requirements and regulations of the military naval and other public services of Great Britain and India I have added very materially to the work in order to try in addition to meet the wants of general practice The explanations given in the several chapters into which the book is divided are expressed in as concise

and simple terms as appeared to me compatible with a sufficient elucidation of the matters treated on in them having regard to the needs of those who have not previously given particular attention to the branch of ophthalmic practice with which the work deals and not forgetting the little time which as a rule is at the disposal of practitioners for the study of any special subjects beyond those which the demands of ordinary practice render essential I have found it convenient to reprint a portion of the Preface to the third edition of this Manual in order to show the aim and scope of those parts of the work which especially bear on optical practice in the public services The advantages that are afforded by the illustrations which appear for the first time in this edition and with the single exception of fig 65 are taken from original drawings furnished by my late colleague Inspector General Dr Macdonald R N F R S will be sufficiently apparent on observation of the illustrations themselves About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
