## **Starting Out With C 7th Edition:**

Starting Out with C++ Tony Gaddis, Judy Walters, Godfrey Muganda, 2011 Tony Gaddis's accessible step by step presentation helps beginning students understand the important details necessary to become skilled programmers at an introductory level. Gaddis motivates the study of both programming skills and the C programming language by presenting all the details needed to understand the how and the why but never losing sight of the fact that most beginners struggle with this material. His approach is both gradual and highly accessible, ensuring that students understand the logic behind developing high quality programs. In Starting Out with C Early Objects, Gaddis covers objects and classes early, after functions and before arrays and pointers. As with all Gaddis texts, clear and easy to read code listings, concise and practical real world examples, and an abundance of exercises appear in every chapter. This text is intended for either a one semester accelerated introductory course or a traditional two semester sequence covering C programming.
