The Virtual Future

William Sims Bainbridge,2011-09-06

The newest communication technologies are

profoundly changing the world s politics economies and cultures but the specific implications of online game worlds remain

mysterious The Virtual Future employs theories and methods from social science to explore nine very different virtual futures

The Matrix Online Tabula Rasa Anarchy Online Entropia Universe Star Trek Online EVE Online Star Wars Galaxies World of

Warcraft Burning Crusade and The Chronicles of Riddick Each presents a different picture of how technology and society

could evolve in coming centuries but one theme runs through all of them the attempt to escape the Earth and seek new

destinies among the stars Four decades after the last trip to the moon a new conception of spaceflight is emerging Rather

than rockets shooting humans across vast physical distances to sterile rocks that lack the resources to sustain life perhaps

robot space probes and orbiting telescopes will glean information about the universe that humans can then experience inside

computer generated environments much closer to home All nine of these fantastically rich multiplayer masterpieces have

shown myriads of people that really radical alternatives to contemporary society could exist and has served as a laboratory

for examining the consequences Each is a prototype of new social forms a utopian subculture and a simulation of

technologies that have yet to be invented They draw upon several different traditions of science fiction and academic

philosophy and they were created in several nations By comparing these nine role playing fantasies we can better consider

what kind of world we want to inhabit in the real future Conflict and Cooperation in the Global Commons Scott

Jasper,2012-09-17 More than ever international security and economic prosperity depend upon safe access to the shared

commons both by strengthening international norms of responsible behavior and by maintaining relevant and interoperable

military capabilities In the face of persistent threats some hybrid in nature and their consequences Conflict and Cooperation in the Global Commons provides a forum where contributors identify ways to strengthen and maintain responsible use of the global commons The result is a comprehensive approach that will enhance align and unify commercial industry civil agency and military perspectives and actions Asia's Naval Expansion Geoffrey Till,2017-10-03 The navies of China India and to a lesser extent Japan are expanding rapidly at present This has the potential to alter the US dominated naval balance in Asia Pacific but it also raises a question are the regions powers involved in a naval arms race Naval development is and always has been a crucial indicator of economic and political development It shows the emergence of a significant shift in strategic weight from West to East But within the Asia Pacific Region alongside growing economic and institutional integration there are geo political tensions that threaten the regions stability and peace The balance between the two determines the form that naval development in that region is taking Some aspects of this suggest the beginnings of a naval arms race that would have profound consequences for the region and the world **Oversight of the U.S. Coast Guard Budget** United States.
