

UbD: Stages of Backward Design

Stage 1. Identify desired results.

Guiding Questions

- What are the established goals?
- What "big ideas" do we want students to come to understand?
- What essential questions will stimulate inquiry?
- What knowledge and skills need to be acquired given the understandings and related content standards? What focus questions will guide students to targeted knowledge and skills?

Stage 2. Determine acceptable evidence.

Guiding Questions

- What is sufficient and telling evidence of understanding?
- Keeping the goals in mind, what performance tasks should anchor and focus the unit?
- What criteria will be used to assess the work?
- Will the assessment reveal and distinguish those who really understand versus those who only seem to understand?

3. Plan learning experiences and instruction.

Guiding Question

- What instructional strategies and learning activities are needed to achieve the results identified in Stage 1 and reflected in the assessment evidence specified in Stage 2?

Online learning has become an important vehicle for teacher and student learning. When well-designed online environments can be very powerful in a way that is consistent with the goals of inquiry, experimentation, investigation, reasoning, and problem solving, so learners can develop a deep understanding of a subject. Some subjects, however, are not well suited for this type of learning due to the need for small group collaborating and hands-on problem solving. The *Handbook of Research on Online Pedagogical Models for Mathematics Teacher Education* provides innovative insights into technology applications and tools used in teaching mathematics online and provides examples of online learning environments and platforms that are suitable for meeting math education goals of inquiry, investigation, reasoning, and problem solving. The content within this publication examines access to education, professional development, and web-based learning. It is designed for teachers, curriculum developers, instructional designers, educational software developers, IT consultants, higher education faculty, policymakers, administrators, researchers, academicians, and students. *A Case for Change in Teacher Preparation* Julie Gorlewski, Amanda Winkelsas, Suzanne N. Rosenblith, Corrie Stone-Johnson, Elisabeth Etopio, David Gorlewski, Tiffany Karalis Noel, Bobbie Finocchio, Amanda Seccia, Ling Zhai, Erin Kearney, Xiufeng Liu, Nooshin Shafaei, Tanika Shedrick, 2021-08-19. Why are preservice teachers often told by veteran teachers to forget what you learned in teacher preparation programs? Why is there a gap between pedagogical practices employed at schools and those taught at colleges and universities? And why, after evidence from countless studies, are there still so few teachers of color working in our rapidly diversifying schools? These questions are addressed in this book, which describes a reconceptualized teacher preparation program based on a teacher residency model. This model is grounded in three core beliefs: first, that teacher quality is a shared responsibility between universities and school districts; second, that all students have a right to high-quality teachers who are as racially, ethnically, and linguistically diverse as the students they teach; and third, that for education to be transformative, future educators must have the right balance of theoretical knowledge and practical experiences grounded in specific contexts. Through a combination of rich description and qualitative and quantitative program data, the authors make the case that university programs focused on the communities they serve can ensure more effective learner-ready teachers who remain in the profession longer. By providing a detailed blueprint for program development, the contents of this book will be of value and interest to educational leaders, policy makers, and researchers. *Rethinking Teacher Supervision and Evaluation* Kim Marshall, 2024-08-06.
