**Contaminated Sediments** Danny D. Reible, 2013-07-20 The purpose of this book is to help engineers and scientists better understand contaminated sediment sites and identify and design remedial approaches that are more efficient and effective. Contaminated sediment management is a difficult and costly exercise that is rarely addressed with easily identified and implemented remedies. It is hoped that this book can help identify and implement management approaches that provide an optimal if not entirely satisfactory solution to sediment contaminant problems. *The Economics of Quality, Grades and Brands (Routledge Revivals)* Peter Bowbrick, 2014-08-01 Virtually every decision to produce, buy or sell is influenced by quality yet until this book was first published in 1992 there had been very little attempt to produce a comprehensive and practical theory for this. Here Peter Bowbrick brings together different traditions of quality analysis from economics, marketing, economics and marketing itself to identify the limitations of the different traditions of quality economics and some approaches to its analysis. Beginning with a definition of the subject and the concepts involved, this comprehensive title will be of particular value to students of Economics, Marketing and Business Studies.

**Life Cycle Assessment** Aiduan Borrión, Mairi J Black, Onesmus Mwabonje, 2021-03-19 Life cycle assessment (LCA) is an established methodology used to quantify the environmental impacts of products, processes and services. Circular economy (CE) thinking is a conceptual way of considering the impacts of consuming resources. By taking a closed loop approach, CE provides a framework for influencing behaviours and practices to minimise this impact. Development of the circular economy is a crucial component in the progression towards future sustainability. This book provides a robust systematic approach to the circular economy concept using the established methodology of LCA. Including chapters on circular economic thinking, the use of LCA as a metric and linking LCA to the wider circular economy, this book utilises case studies to illustrate the approaches to LCA. With contributions from researchers worldwide, Life Cycle Assessment provides a practical global guide for those who wish to use LCA as a research tool or to inform policy process and product improvement.

*The Psychometrics of Standard Setting* Mark D. Reckase,2023-01-31 This book provides a unifying structure for the activities that fall under the process typically called standard setting on tests of proficiency Standard setting refers to the methodology used to identify performance standards on tests of proficiency The results from standard setting studies are critical for supporting the use of many types of tests The process is frequently applied to educational psychological licensure certification and other types of tests and examination systems The literature on procedures for standard setting is extensive but the methodology for standard setting has evolved in a haphazard way over many decades without a unifying theory to support the evaluation of the methods and the validation of inferences made from the standards This book provides a framework for going beyond specific standard setting methods to gain an understanding of the goals for the methods and how to evaluate whether the goals have been achieved The unifying structure provided in this book considers policy that calls for the existence of performance standards the relationship of proficiency test design to the policy and tasks assigned to subject matter experts to help them convert the policy to estimates of locations on the reporting score scale for the test The book provides guidance on how to connect the psychometric aspects of the standard setting process to the intentions of policy makers as expressed in policy statements Furthermore the structure is used to support validity arguments for inferences made when using standards Examples are provided to show how the unifying structure can be used to evaluate and improve standard setting methodology

Waheed, 2025-09-26 In recent years scholars of International Relations have increasingly turned their attention to the question of how to decolonize knowledge While emerging debates and initiatives mark a critical step toward exposing the discipline s embedded power structures there remains a striking lack of systematic empirical research into how these asymmetries are reproduced and experienced within the Global South itself This book explores the coloniality of power and knowledge in Pakistan through an examination of Pakistani International Relations It not only unveils the hegemonic processes embedded within the western capitalist structures of knowledge production but also explores how the eurocentrism of International Relations in Pakistan is sustained and maintained through a coloniality of knowledge and power which is designed to promote western epistemologies and emulate western standards This book consequently provides a view of epistemic oppression from below In doing so it is an initial attempt to explore how the process of decolonization can begin to address the issues embedded in the coloniality of knowledge demonstrated through an exploration of the International Relations discipline in Pakistan
