Science Model Curriculum Guide, Kindergarten Through Grade Eight California. State Department of Education, 1987 This guide was developed with the intention of helping teachers and school site administrators in California review the elementary science curriculum and compare it to an idealized model that is presented in the document Part I of the guide provides a summary of a number of characteristics considered to be important to a strong elementary science program It was designed to aid teachers principals and parents in identifying features of their local science program where attention is needed Part II presents a full scale portrait of an elementary science program that focuses on the development of student understanding This section presents teaching ideas that are concerned with both the knowledge base and science

process skills Common themes are present in the discussion of science instruction in the various subject areas The disciplines and associated themes addressed are 1 biological science cells genetics evolution plants protists animals human beings ecosystems 2 earth science astronomy geology and natural resources meteorology oceanography and hydrology and 3 physical science matter mechanics energy sources and transformation heat light electricity magnetism and sound TW
