Improving Reading

Comprehension of Self-Chosen Books Through Computer Assessment and Feedback Keith James Topping, 2022-07-12

Schools around the world use online programs like Accelerated Reader and Reading Counts to improve students' reading comprehension of real books but how can such software be used most effectively? In this unique resource, researcher Keith Topping analyzes independent research studies and brings you best practices on quality implementation to enhance effectiveness. He explains the evidence base for the programs in a comprehensible way and addresses many common questions such as: Does it work? How should it be implemented to make it work? and Is it cheaper and more efficient in teacher time than what we were doing before? He also discusses best practices for using the assessment data for tailoring implementation in elementary vs. high schools and for working with disadvantaged students. Appropriate for teachers, literacy coaches, curriculum leaders, and other stakeholders, the book will provide you with a strong research foundation and easily accessible information to help you fine-tune your understanding of the reading programs and implement them more successfully in your schools and classrooms.

Walker,2007-02 If you keep doing what you have always done you will continue to get what you have always gotten Westside Elementary in Powell Wyoming went from mediocre scores on the Wyoming State Test to being one of the top academic schools in the state In *Recipe for a Blue Ribbon School* author and school principal Brent Walker details different interventions that resulted in Westside being recognized as a No Child Left Behind Blue Ribbon School Real change requires you to start using what you already have differently In most cases the changes were not new but a different way of doing things The staff started using assessment data to drive the schedules programs use of time collaboration and use of technology to truly focus on each child becoming proficient in reading math and writing In addition different amounts of learning time were provided for every student These two paradigm shifts allowed Westside s staff to prove their philosophy All kids can learn True change requires trust courage and stamina By working together as a team using a unique collaboration model the staff of Westside made passive learners into active learners Discover how you too can help your students achieve academic greatness **Teaching Science with Hispanic ELLs in K-16 Classrooms** Dennis W.

Sunal,Cynthia S Sunal,Emmett L. Wright,2010-04-01 The goal of this fourth volume of RISE was to provide a research foundation that demonstrates an agenda to strengthen the preparation and enhancement of teachers of science for regions and states experiencing extensive initial growth of Hispanic ELLs in schools The goal was carried out through a series of events that led to the planning and subsequent dissemination of research being conducted by various stakeholders throughout the United States Researchers were first invited from regions of the country that have had a long history of with Hispanic ELLs in classrooms as well as those regions where initial and now extensive growth has occurred only in the past few years A national conference Science Teacher Education for Hispanic English Language Learners in the Southeast SHELLS funded through the National Science Foundation was used as one of the dissemination methods to establish and secure commitments from researchers to a conduct and report research to strengthen teacher preparation for science The national call for manuscripts requested the inclusion of major priorities and critical research areas methodological concerns and concerns and results of implementation of teacher preparation and development programs **The Left Hand of Data**

Matthew Berland,Antero Garcia,2024-04-23 A speculative framework that imagines how we can use education data to promote play creativity and social justice over normativity and conformity Educational analytics tend toward aggregation asking what a normative learner does In *The Left Hand of Data* educational researchers Matthew Berland and Antero Garcia

start from a different assumption that outliers are and must be treated as valued individuals Berland and Garcia argue that the aim of analytics should not be about enforcing and entrenching norms but about using data science to break new ground and enable play and creativity From this speculative vantage point they ask how we can go about living alongside data in a better way in a more just way while also building on the existing technologies and our knowledge of the present The Left Hand of Data explores the many ways in which we use data to shape the possible futures of young people in schools in informal learning environments in colleges in libraries and with educational games It considers the processes by which students are sorted labeled categorized and intervened upon using the bevy of data extracted and collected from individuals and groups anonymously or identifiably When how and with what biases are these data collected and utilized What decisions must educational researchers make around data in an era of high stakes assessment surveillance and rising inequities tied to race class gender and other intersectional factors How are these complex considerations around data changing in the rapidly evolving world of machine learning AI and emerging fields of educational data science The surprising answers the authors discover in their research make clear that we do not need to wait for a hazy tomorrow to do better today **How It's Being**
