Transforming the School-to-Prison Pipeline Debra M Pane,Tonette S Rocco,2014-02-05 Revolution not reform is required to release the power of teaching Virtually all teachers possess tremendous power which can be released given the proper exposure We can t get to that point by tinkering with a broken system We must change our intellectual structures definitions and assumptions then we can release teacher power Hilliard 1997 This book was written during a time of growing upheaval and disagreement about how America should educate its students particularly those who are poor diverse and failing school Dominant educational research newspapers and popular movies such as Waiting for Superman continually fuel public debates about whether our 21st century schools provide justice for all decrease the achievement gap and leave no child behind However even though one of teachers greatest concerns and why many leave the profession classroom discipline is rarely brought to the forefront of discussion As a result public discourse does not get into what actually happens during disciplinary moments that ultimately leads to the disproportional tracking of particular students into exclusionary school disciplinary consequences which funnels an underclass of students into the school to prison pipeline This book is a scholarly study presented here as a readable story and practical guide for walking teachers administrators and teacher education programs through the process of transforming traditional ways of thinking about classroom discipline and teaching in order to create student centered creative non punitive classrooms that authentically
