The Emotional Reservoir is a phrase he coined based on the study of the enormous effect of the sun on the earth and how it affects human biology physiology and behavior According to his theory these environmental differences have numerous effects on human beings also on how the environment can dictate human intelligence This theory also suggests that the people who evolved out of sub Saharan Africa tend to possess more Emotional Reservoir than the Europeans and Asians who evolved in a colder environment and who tend to have a lesser Emotional Reservoir Furthermore this higher Emotional Reservoir is also responsible for certain behaviors that are detrimental to the growth and the stability of these groups which in turn cause behavioral pathologies and poor decision making

ADHD Thom Hartmann,2019-09-03 A newly revised and updated edition of the classic guide to reframing our view of ADHD and embracing its benefits Explains that people with ADHD are not disordered or dysfunctional but simply hunters in a farmer s world possessing a unique mental skill set that would have allowed them to thrive in a hunter gatherer society Offers concrete non drug methods and practices to help hunters and their parents teachers and managers embrace their differences nurture creativity and find success in school at work and at home Reveals how some of the world s most successful people can be labeled as ADHD hunters including Benjamin Franklin Thomas Edison and Andrew Carnegie With 10 percent of the Western world s children suspected of having Attention Deficit Disorder or ADHD and a growing number of adults self diagnosing after decades of struggle the question must be raised How could Nature make such a mistake In this updated edition of his groundbreaking classic Thom Hartmann explains that people with ADHD are not abnormal disordered or dysfunctional but simply hunters in a farmer s world Often highly creative and single minded in pursuit of a self chosen goal those with ADHD symptoms possess a unique mental skill set that would have allowed them to thrive in a hunter gatherer society As hunters they would have been constantly scanning their environment looking for food or threats distractibility they d have to act without hesitation impulsivity and they d have to love the high stimulation and risk filled environment of the hunting field With our structured public schools office workplaces and factories those who inherit a surplus of hunter skills are often left frustrated in a world that doesn t understand or support them As Hartmann shows by reframing our view of ADHD we can begin to see it not as a disorder but as simply a difference and in some ways an advantage He reveals how some of the world s most successful people can be labeled as ADHD hunters and offers concrete non drug methods and practices to help hunters and their parents teachers and managers embrace their differences nurture creativity and find success in school at work and at home Providing a supportive survival guide to help fine tune your natural skill set rather than suppress it Hartmann shows that each mind whether hunter farmer or somewhere in between has value and great potential waiting to be tapped

The Science of Renewable Energy Frank R. Spellman,Revonna M. Bieber,2016-04-19 As time goes forward the availability of affordable and accessible petroleum products decreases while the negative environmental impact increases If we want to sustain our current way of life which includes massive energy consumption it is necessary to find alternatives to fossil fuels to

prevent fuel shortages and to preserve and repair the environment around us The Science of Renewable Energy presents a no nonsense discussion of the importance of renewable energy while adhering to scientific principles models and observations The text includes in depth discussions of emerging technologies including biomass and fuel cells and major sources of renewable energy such as ocean hydro solar and wind energy To provide a fundamental understanding of the basic concepts of renewable energy the book also offers an extensive discussion on the basics of electricity since it is applied to and produced from all forms of renewable energy While emphasizing the technical aspects and practical applications of renewable sources the text also covers the economic social and policy implications of large scale implementation The main focus of the book is on methods of obtaining energy from self replenishing natural processes while limiting pollution of the atmosphere water and soil as this is a critical pathway for the future Exploring the subject from a scientific perspective highlights the need for renewable energy and helps to evaluate the task at hand The book is written for a wide range of readers including students of diverse backgrounds and individuals in the energy industries and presents the material in a user friendly manner Even individuals can have an impact on the quest to develop renewable energy sources The concepts and guidelines described provide critical scientific rationale for pursuing clean and efficient energy sources as well as the knowledge needed to understand the complex issues involved Woven with real life situations the text presents both the advantages and challenges of the different types of renewable energy

Environmental Impacts of Renewable Energy Frank R. Spellman, 2014-12-02 Renewable Energy Has a Good Side and a Bad Side Evaluate Both All energy sources affect the environment in which we live While fossil fuels may essentially do more harm renewable energy sources can also pose a threat to the environment Allowing for the various renewable energy sources solar wind hydro biomass and geothermal

Greening through IT Bill Tomlinson, 2012-02-10 How the tools of information technology can support environmental sustainability by tackling problems that span broad scales of time space and complexity Environmental issues often span long periods of time far flung areas and labyrinthine layers of complexity In *Greening through IT* Bill Tomlinson investigates how the tools and techniques of information technology IT can help us tackle environmental problems at such vast scales Tomlinson describes theoretical technological and social aspects of a growing interdisciplinary approach to sustainability Green IT offering both a human centered framework for understanding Green IT systems and specific examples and case studies of Green IT in action Tomlinson describes many efforts toward sustainability supported by IT from fishers in India who maximized the sales potential of their catch by coordinating their activities with mobile phones to the installation of smart meters that optimize electricity use in California households and offers three detailed studies of specific research projects that he and his colleagues have undertaken EcoRaft an interactive museum exhibit to help children learn principles of restoration ecology Trackulous a set of web based tools with which people can chart their own environmental behavior and GreenScanner an online system that provides access to environmental impact reports about consumer products Taken together these examples illustrate the significant environmental benefits that innovations in information technology can enable

The Environmental Documentary John A. Duvall, 2017-05-18 *The Environmental Documentary* provides the first extensive coverage of the most important environmental films of the decade including their approach to their topics and their impacts on public opinion and political debate While documentaries with themes of environmental activism date back at least to Pare Lorenz's films of the 1930's no previous decade has produced the number and quality of films that engage environmental issues from an activist viewpoint The convergence of high profile

issues like climate change fossil fuel depletion animal abuse and corporate malfeasance has combined with the miniaturization of high quality recording equipment and the expansion of documentary programming to produce an unprecedented number of important and influential documentary productions The text examines the processes of production and distribution that have produced this explosion in documentaries The films range from a high profile Hollywood production with theatrical distribution like *An Inconvenient Truth* to shorter independently produced films like *The End of Suburbia* that have reached a small audience of activists through video distribution interviews with many of the filmmakers and word of mouth

The Apple Grower Michael Phillips, 2005-10 For decades fruit growers have sprayed their trees with toxic chemicals in an attempt to control a range of insect and fungal pests Yet it is possible to grow apples responsibly by applying the intuitive knowledge of our great grandparents with the fruits of modern scientific research and innovation Since *The Apple Grower* first appeared in 1998 orchardist Michael Phillips has continued his research with apples which have been called organic's final frontier In this new edition of his widely acclaimed work Phillips delves even deeper into the mysteries of growing good fruit with minimal inputs Some of the cutting edge topics he explores include The use of kaolin clay as an effective strategy against curculio and borers as well as its limitations Creating a diverse healthy orchard ecosystem through understory management of plants nutrients and beneficial microorganisms How to make a small apple business viable by focusing on heritage and regional varieties value added products and the community orchard model The author's personal voice and clear eyed advice have already made *The Apple Grower* a classic among small scale growers and home orchardists In fact anyone serious about succeeding with apples needs to have this updated edition on their bookshelf

Sun Power Neville Williams, 2025-10-16 America is on the brink of a green energy revolution that can save the planet and increase peace and prosperity by harnessing the unlimited solar power After decades of promise the technology for alternative energy solutions now exists to replace our dangerous addiction to fossil fuels with cheap clean solar energy Neville Williams has been on the leading edge of this revolution for decades and knows from firsthand experience how sun power can transform lives and communities for the better He has traveled the globe bringing solar generated electricity to struggling communities throughout Asia Africa India and the developing world From isolated villages high in the mountains of Nepal to remote settlements in South Africa Williams has worked to bring sun power to even the most off the grid reaches of the planet He has brought that knowledge and experience back to America where he founded one of the country's fastest growing solar companies If millions of poor families in the Third World can get their power from the sun why can't Americans concerned with their rising power bills dependence on foreign oil and carbon footprints do the same The answer is that sun power is here it works and can light up a new era of economic and environmental security if we have the will to seize this historic opportunity This book is not about predictions or promises It's

about what's happening now all over the world and what still needs to be done. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Homesick Lyla Yastion, 2018-09-15 Human-induced climate change is emerging as the most critical issue of the modern era. Ninety-seven percent of climate scientists now confirm that human extraction and burning of fossil fuels along with rampant deforestation is causing a rapid build-up of carbon dioxide and other greenhouse gases in air and water. These emissions heat up the planet and may be pushing Earth's capacity beyond the threshold at which equilibrium can be restored. Global warming is sustained by a global capitalist economy dependent upon the fossil fuel industry and agribusiness, both of which are unsustainable. The toxic effects of air pollution, ocean acidification, and soil degradation are harming the health of all species. Through an interdisciplinary approach that brings in the perspectives of the physical sciences, psychology, anthropology, economics, cultural history, and spirituality, *Homesick* investigates the evolutionary path by which human beings have arrived at this precarious juncture. It proposes that this perilous detour in human cultural evolution arises from a fallacious belief that the human species, unlike other species, is not bound by ecological laws but has a special right to control and master the natural world. Human beings suffer from the illusion that they are separate from the Earth, their planetary home, which is perceived as an object, a commodity to exploit through technology. They have forgotten what indigenous peoples still remember: humanity is part of, not apart from, the natural world. *Homesick* argues that cultural transformation towards a sustainable future is possible when human beings reawaken to Nature as partner and provider. As memory of their embeddedness in the natural world is aroused, they will experience love and respect for the interdependent web of life that sustains them. This reawakening incrementally induces a radical change in thinking within society and sets in motion a paradigm shift. Cultural institutions are then reshaped to match this new benign worldview.

Creating Sanctuary Sandra L. Bloom, 2013-04-12 *Creating Sanctuary* is a description of a hospital-based program to treat adults who had been abused as children and the revolutionary knowledge about trauma and adversity that the program was based upon. This book focuses on the biological, psychological, and social aspects of trauma. Fifteen years later, Dr. Sandra Bloom has updated this classic work to include the groundbreaking Adverse Childhood Experiences Study that came out in 1998, information about epigenetics, and new material about what we know about the brain and violence. This book is for courses in counseling, social work, and clinical psychology on mental health, trauma, and trauma theory.

Six Stages on the Spiritual Path Ruth Whitney, 2021-05-21 In *Six Stages on the Spiritual Path*, we learn about spirituality and its stages as well as how spirituality helps to reduce our suffering and create more love. Writings from ancient to contemporary mystics across the world provide us with practical and spiritual wisdom that will make our lives happier and more loving. In the first stage on the mystic way, children experience awe and wonder but they do not realize that this is a spiritual experience. While all indigenous people recognize awe as a mystical experience, only some adults and most artists do. When parents and religious leaders teach children about God, they cause their spiritual growth to flourish or to

become stunted at an elementary school level Awakening is an experience of the Divine that helps us realize that the Sacred Spirit is within us and loves us Awakening produces love for our neighbors and ourselves Then love nurtures more awakenings Illumination and union are deeper mystical experiences that the Holy One is not only within all of us and all of creation but also that we are within the ONE Illumination creates more love for all people and all the universe *The Art and Science of Change* , **2013: the End of Days or a New Beginning?
