whose building blocks are one dimensional extended objects called strings rather than the zero dimensional point particles
that form the basis for the standard model of particle physics The phrase is often used as shorthand for Superstring theory as
well as related theories such as M theory By replacing the point like particles with strings an apparently consistent quantum
theory of gravity emerges Moreover it may be possible to unify the known natural forces gravitational electromagnetic weak

predicts higher dimensional objects called branes String theory strongly suggests the existence of ten or eleven in M theory
