General Method of Solving Equations of All Degrees Oliver Byrne, 1868 **The Transposing Method of Solving Algebra Equations** Wayne R. Matson, Hoover, Dale, 2010-10-28 This book offers one proven solution to a major problem Nationally 90 % of entering college freshmen can't solve equations Obviously something is wrong The Transposing Method of Solving Equations is a far superior method than the traditional Whatever you do to one side you do to the other side Method taught in schools today With The Transposing Method you will be able to solve equations with 1/3 the steps and in significantly less time and you will eliminate a lot of messy scratch work The two methods are compared in the book The book also provides a Diagnostic Test with 10 simple equations 90 % of college students can not even get 2 correct With just a few simple rules you will be able to solve every equation you will encounter in a typical School Algebra and or College Algebra course There is no difference between High School Algebra and College Algebra Algebra is Algebra This book is a Self Teaching Course to help you Solve ALL Equations This book will help you NOW and be your Reference for any FUTURE Math Course I have enjoyed collaborating with Professor Matson the past two years at KSU Dr Matson brings many years of teaching expertise and a wide range of related work experience including the space program into the classroom His students recent results on tests exams were the highest that I have seen in my ten years at this University When Dr Matson noted a deficiency in the current textbook he began authoring new textbooks for entry level students I have been proofing the textbooks and can attest to their rigor and effectiveness in helping other instructors to have the success Dr Matson has achieved Students would make a significant step forward in their mastery of mathematical concepts by being in the classroom with Dr Matson and or obtaining copies of his recently published textbooks Ronald Hoover Mathematics Instructor Kennesaw State University *Solving Linear Equations, Part 1* , In this lesson work through simple one and two step linear equations learning how to isolate the variable by different operations Professor Sellers also presents a word problem involving a two step equation and gives tips for how to solve it New simple ways to solve equations Einar Östmyren, 2018-03-15 In this book I present a unique formula for quadratic equations which is a rewriting of the p q formula This rewriting resulted in the equations being solved almost twice as fast by the new formula when it was compared in a test with the p q formula Another test also showed that the new formula was much faster than the Vedic formula The new formula is unique because the equations in the test were solved by mere mental calculation which improves the memory and increases mental agility and intelligence When I discovered that the middle coefficient in a quadratic equation contains all information about its origin it led to a rule that simplified the solving of all equations In a quadratic equation the origin could be located and then it became possible to create a rule how the coefficients were to be split up into factors By means of this rule and some exercises the answer to an equation can be both calculated and checked regardless of how large the coefficients are This universal method is intended to be used before the equation is solved by a formula Since the origin of a

quadratic equation could be located it was also simple to find the origin to other types of equations and therefore new methods could be created This led to the fact that a cubic equation could be solved without taking detours like polynomial division a guess or a test of a root When the origin of an equation can be located it is as easy to solve a fifth degree equation as a quadratic equation in the same simple way as unlocking a safe with a key The the purpose of the book is mainly to make it as simple as possible for the students to solve equations but also to give them a good insight into the origin of an equation
