IT and Telecom Basics Ekaaksh Deshpande, 2025-01-03

In an ever evolving landscape, mastering information technology and telecommunications is crucial for the success of any organization. As new applications and technologies emerge daily, staying updated on these advancements is essential to remain competitive and efficient. Our program in information technology training helps managers understand the impact of these new technologies and how to integrate them into their business structures. By keeping abreast of trends like Web 2.0, managers can assess these innovations from both a technical and strategic perspective. The evolution of computers and communication technologies has transformed production and distribution into more market-like structures. Providing 24-hour access to pricing and product information has significantly reduced barriers to market efficiency. This infrastructure also facilitates real-time transactions, potentially making roles such as sales agents and brokers redundant, thus reducing costs in the value chain. Furthermore, the rise of information technologies has enabled advanced mail order retailing. Products can now be ordered effortlessly via phones or computer networks and delivered by suppliers through integrated transportation networks which heavily rely on computers and communication technologies to manage their operations.
