Fundamentals of Database Systems Ramez Elmasri,Sham Navathe,2007 This edition combines clear explanations of database theory and design with up to date coverage of models and real systems It features excellent examples and access to Addison Wesley s database Web site that includes further teaching tutorials and many useful student resources <u>Database Reengineering and Interoperability</u> T.Y. Cheung,J. Fong,B. Siu,2012-12-06 Modern computing management systems and application programs are often de signed as open systems In an open environment the users application programs serving similar purposes though possibly implemented using different hardware or software tech nologies can interact easily and properly with one other But it is a big challenge in research and development to provide the means for integrating these technologies and reengineering the new or existing management systems so as to make all of the relevant components interoperable In case of databases because of the variety in data models and theory the interoper ability and reengineering issues become even more complex and crucial especially for companies heavily involved in data management With the rapid advances in networking and database modeling technology old issues may have to be reinvestigated and new issues come up constantly It is our hope that this year s workshop the sixth in a series of annual events can provide a timely forum for database researchers and practitioners to share their recent experience and results in various aspects of this fast developing field This series of workshops has been organized by the Hong Kong Computer Society and financially supported by many local industrial and business companies This year the Cooperative Research Centre for Open Systems Technology located in the Department of Computer Science City University of Hong Kong has joined the organization team and the list of financial sponsors **Database Systems For Advanced Applications '95 - Proceedings Of The Fourth International Conference** Wang Ling Tok,Yoshifumi Masunaga,1995-03-31 This volume contains three keynote papers and 51 technical papers from contributors around the world on topics in the research and development of database systems such as Data Modelling Object Oriented Databases Active Databases Data Mining Heterogeneous Databases Distributed Databases Parallel Query Processing Multi Media Databases Transaction Management Systems Document Databases Temporal Databases Deductive Databases User Interface and Advanced Database Applications <u>Handbook on Enterprise Architecture</u> Peter Bernus,Laszlo Nemes,Günter Schmidt,2012-12-06 This Handbook is about methods tools and examples of how to architect an enterprise through considering all life cycle aspects of Enterprise Entities such as individual enterprises enterprise networks virtual enterprises projects and other complex systems including a mixture of automated and human processes The book is based on ISO15704 2000 or the GERAM Framework Generalised Enterprise Reference Architecture and Methodology that generalises the requirements of Enterprise Reference Architectures Various Architecture Frameworks PERA CIMOSA Grai GIM Zachman C4ISR DoDAF are shown in light of GERAM to allow a deeper understanding of their contributions and therefore their correct and knowledgeable use The handbook addresses a wide variety of audience and

covers methods and tools necessary to design or redesign enterprises as well as to structure the implementation into manageable projects **Database Systems for Advanced Applications** Shamkant B. Navathe,Weili Wu,Shashi Shekhar,Xiaoyong Du,X. Sean Wang,Hui Xiong,2016-03-24 This two volume set LNCS 9642 and LNCS 9643 constitutes the refereed proceedings of the 21st International Conference on Database Systems for Advanced Applications DASFAA 2016 held in Dallas TX USA in April 2016 The 61 full papers presented were carefully reviewed and selected from a total of 183 submissions The papers cover the following topics crowdsourcing data quality entity identification data mining and machine learning recommendation semantics computing and knowledge base textual data social networks complex queries similarity computing graph databases and miscellaneous advanced applications **Handbook of Fuzzy Computation** E Ruspini,P Bonissone,W Pedrycz,2020-03-05 Initially conceived as a methodology for the representation and manipulation of imprecise and vague information fuzzy computation has found wide use in problems that fall well beyond its originally intended scope of application Many scientists and engineers now use the paradigms of fuzzy computation to tackle problems that are either intractable Handbook of Research on Emerging Rule-Based Languages and Technologies: Open Solutions and Approaches Giurca, Adrian,Gasevic, Dragan,Taveter, Kuldar,2009-05-31 This book provides a comprehensive collection of state of the art advancements in rule languages Provided by publisher *Advances in Object-Oriented Database Systems* Asuman Dogac,M.Tamer Özsu,Alexandros Biliris,Timos Sellis,2013-11-09 Object oriented database management systems OODBMSs have generated significant excitement in the database community in the last decade This interest stems from a real need for data management support for what are called advanced application areas that are not well served by relational technology The case for object oriented technology has been made on three fronts First is the data modeling requirements of the new applications Some of the more important shortcomings of the relational systems in meeting the requirements of these applications include 1 Relational systems deal with a single object type a relation A relation is used to model different real world objects but the semantics of this association is not part of the database Furthermore the attributes of a relation may come only from simple and fixed data type domains numeric character and sometimes date types Advanced applications require explicit storage and manipulation of more abstract types e g images design documents and the ability for the users to define their own application specific types Therefore a rich type system supporting user defined abstract types is required 2 The relational model structures data in a relatively simple and flat manner Non traditional applications require more complex object structures with nested objects e g a vehicle object containing an engine object Innovations Through Information Technology Information Resources Management Association. International Conference,2004-01-01 Innovations Through Information Technology aims to provide a collection of unique perspectives on the issues surrounding the management of information technology in organizations around the world and the ways in which these issues are addressed This valuable book is a compilation of features including the latest research in the area of IT utilization and management in addition to

being a valuable source in support of teaching and research agendas *Computer Science Foundations Quiz Book* S.R. Justification Methods for Computer Integrated Manufacturing Systems H. R. Parsaei,Thomas Ward,Waldemar Karwowski,1990 Advanced automated manufacturing technology systems are perceived by many manufacturers to be the latest alternative to meet today s global market needs Higher productivity better quality and flexibility are just a few examples of the numerous benefits which can be achieved by implementing modern computer controlled manufacturing systems Many firms perceive Computer Integrated Manufacturing CIM as one of the most promising paths to achieve

manufacturing excellence A CIM project can not be successfully implemented unless it is supported by long term strategic planning and economic analysis of the required capital investment decisions This book treats planning as the first step in the justification process Papers explore both strategic planning for computer integrated manufacturing CIM and more detailed issues such as part tool grouping and machine loading The critical issue of planning for communications between various levels of computation and devices on the floor is reviewed Capacity planning and planning for assembly and quality control are also covered The important role of champions in justification is explored *The Practice of Enterprise Modeling* Patrick van Bommel,Stijn Hoppenbrouwers,Sietse Overbeek,Joseph Barjis,2010-10-29 This volume constitutes the proceedings of the Third IFIP WG 8 1 Working Conference on the Practice of Enterprise Modeling held in Delft The Netherlands during November 9 10 2010 The goal of the conference is both to foster a better understanding of the practice of enterprise modeling and to improve its theoretical foundations The 17 papers presented were carefully reviewed and selected from 44 submissions They reflect the trend for both practitioners and academics to look into domains and conceptualizations addressing dedicated business oriented topics like business intelligence or domain driven process families and thus reach beyond traditional information systems engineering *Proceedings* ,1985 *Information and Process Integration in Enterprises* Toshiro Wakayama,Srikanth Kannapan,Chan Meng Khoong,Shamkant Navathe,JoAnne Yates,2012-12-06 Information and Process Integration in Enterprises Rethinking Documents is a bold attempt to address information and process integration issues as a single body of research and practice This book has identified the concept of documents as a common thread linking the integration issues Documents after all are representations of information along with representations of the usage of the information contained therein Rethinking the role of documents is therefore central to re engineering enterprises in the context of information and process integration The chapters of this book are based on papers presented at the International Working Conference on Information and Process Integration in Enterprises IPIC 96 held at MIT on November 14 and 15 1996 The chapters cover a range of issues from the future role of documents in enterprise integration to emerging models of business processes and information use to practical experiences in implementing new processes and technologies in real work environments Information and Process Integration in Enterprises Rethinking Documents is suitable as a secondary text for a graduate level course on information technology
