SOLVED PROBLEMS

1. A sling psychrometer gives reading of 25°C dry bulb temperature & 15°C wet bulb temperature. The barometer indicates 760 mm of Hg assuming partial pressure of the vapour as 10 mm of Hg. Determine 1. Specific humidity 2. Saturation ratio.

Given Data:

Dry bulb temperature $t_d = 25^{\circ}\text{C}$

Wet bulb temperature $t_w = 15^{\circ}\text{C}$ Barometer pressure $p_b = 760\text{ mm of Hg}$

Partial pressure $p_v = 10\text{ mm of Hg}$

To Find:

Specific humidity

Refrigeration and Air Conditioning Problems & Objectives, Refrigeration Engineering, 1923 English abstracts from Kholodil naia tekhnika *Industrial Refrigeration*, 1926 Problem Solving Approaches for Maintaining Operational Excellence in Process Plants Joseph M. Bonem, Nattapong Pongboot, Wiroon Tanthapanichakoon, 2025-01-03 Comprehensive reference providing methods for process engineers and operators to solve challenging process problems and develop working hypotheses for typical process equipment Problem Solving Approaches for Maintaining Operational Excellence in Process Plants provides a template for achieving an enhanced level of operating efficiency in chemical processing plants and refineries With examples included throughout to demonstrate key concepts this book includes methods for formulating working hypotheses for typical process equipment such as pumps compressors heat exchangers furnaces fractionating towers and reactors with additional information on defining and setting metrics and the application of the techniques in unusual situations as well as the application of these techniques in view of commercially available computer simulation programs This book covers topics including initial considerations in problem solving basic steps in problem solving and

verification of process instrument data with solved problems showing how techniques can be applied to prime movers plate processes kinetically limited processes and unsteady state problems This newly revised and updated Second Edition includes coverage of the latest research and developments in the field Written by a team of highly qualified industry professionals Problem Solving Approaches for Maintaining Operational Excellence in Process Plants includes discussion on Lumped parameters as the ideal approach to determine values for key performance indicators KPIs Theoretical KPIs in comparison to actual operation as a method to find hidden problems Situations where experience based solutions are unavailable due to lack of technically trained personnel Solutions to problems where a previous analysis has confirmed a need for new equipment or enhanced operating procedures Digital twins and their usefulness in predicting yields executing plant operations and training operating and technical personnel Problem Solving Approaches for Maintaining Operational Excellence in Process Plants is an essential reference on the subject for chemical engineers industrial engineers process operators process shift supervisors chemical engineers with minimal exposure to industrial calculations and industrial managers who are looking for techniques to improve organization problem solving skills *Proceedings* ,1924 **Food Engineering - Volume I** Gustavo V. Barbosa-Cánovas,2009-08-10 Food Engineering is a component of Encyclopedia of Food and Agricultural Sciences Engineering and Technology Resources in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias Food Engineering became an academic discipline in the 1950s Today it is a professional and scientific multidisciplinary field related to food manufacturing and the practical applications of food science These volumes cover five main topics Engineering Properties of Foods Thermodynamics in Food Engineering Food Rheology and Texture Food Process Engineering Food Plant Design which are then expanded into multiple subtopics each as a chapter These four volumes are aimed at the following five major target audiences University and College students Educators Professional practitioners Research personnel and Policy analysts managers and decision makers and NGOs **Ice and Refrigeration** ,1924 *Power Plant Engineering* ,1928 **The IDEATE Method** Dan Cohen,Greg Pool,Heidi Neck,2019-12-19 Generating new ideas that create substantial value is at the very core of entrepreneurship The IDEATE Method is an ideation method empirically proven to help students identify problems develop creative solutions and select the most innovate entrepreneurial idea Authors Daniel Cohen Gregory Pool and Heidi Neck emphasize the importance of deliberate practice and repetition as they guide students through each phase of the method Identify Discover Enhance Anticipate Target and Evaluate Goal directed activities and self reflection questions help students develop their entrepreneurial mindset and skillset **Refrigerating World** ,1929 **Building Developer** ,1927 [Thermodynamics and Heat Power, Ninth Edition](#) Irving Granet,Jorge Alvarado,Maurice Bluestein,2020-11-05 The ninth edition of Thermodynamics and Heat Power contains a revised sequence of thermodynamics concepts including physical properties processes and energy systems to enable the attainment of learning outcomes by Engineering and Engineering Technology

students taking an introductory course in thermodynamics Built around an easily understandable approach this updated text focuses on thermodynamics fundamentals and explores renewable energy generation IC engines power plants HVAC and applied heat transfer Energy heat and work are examined in relation to thermodynamics cycles and the effects of fluid properties on system performance are explained Numerous step by step examples and problems make this text ideal for undergraduate students This new edition Introduces physics based mathematical formulations and examples in a way that enables problem solving Contains extensive learning features within each chapter and basic computational exercises for in class and laboratory activities Includes a straightforward review of applicable calculus concepts Uses everyday examples to foster a better understanding of thermal science and engineering concepts This book is suitable for undergraduate students in engineering and engineering technology

Learning to Solve Problems David H. Jonassen, 2004-05-03 Learning to Solve Problems is a much needed book that describes models for designing interactive learning environments to support how to learn and solve different kinds of problems Using a research based approach author David H Jonassen a recognized expert in the field shows how to design instruction to support three kinds of problems story problems troubleshooting and case and policy analysis problems Filled with models and job aids this book describes different approaches for representing problems to learners and includes information about technology based tools that can help learners mentally represent problems for themselves Jonassen also explores methods for associating different solutions to problems and discusses various processes for reflecting on the problem solving process Learning to Solve Problems also includes three methods for assessing problem solving skills performance assessment component skills and argumentation
