Intervention, Algebra 1 Module 4 Region 4 Education Service Center, 2016-03 **Equations and Inequalities** Jiri Herman, Radan Kucera, Jaromir Simsa, 2000-03-23 A look at solving problems in three areas of classical elementary mathematics: equations and systems of equations of various kinds, algebraic inequalities and elementary number theory in particular, divisibility and Diophantine equations. In each topic, brief theoretical discussions are followed by carefully worked out examples of increasing difficulty and by exercises which range from routine to rather more challenging problems. While it emphasizes some methods that are not usually covered in beginning university courses, the book nevertheless teaches techniques and skills which are useful beyond the specific topics covered here. With approximately 330 examples and 760 exercises.

Accelerated Intervention, Algebra 1 Module 4 Region 4 Education Service Center, 2015-12-01 **Summit Math Algebra 1 Book 2** Alex Joujan, 2020-01-04 Learn math in a guided discovery format. These teaching textbooks are designed to let students learn at their own pace. Summit Math books are for curious students who want learning to feel like a journey. The scenarios are arranged to show how new math concepts are related to previous concepts they have already learned. Students naturally learn at different paces, and these books help teachers manage flexible pacing in their classes. Learn more at www.summitmathbooks.com. Topics in this book: Plotting points on a graph, Graphing a line using an equation and a T chart, Graphing a line using its intercepts, Constant rates, The slope of a line, Writing a line's equation in Slope Intercept Form, Parallel and perpendicular lines, Scenarios that involve linear equations, Linear inequalities, Cumulative Review, Answer Key. Book description: This book builds on the introduction to rates at the end of Algebra 1 Book 1. Students learn that a constant rate of change produces a linear relationship. They learn about x and y intercepts and they graph equations in Standard Form. After they learn about slopes of lines, the book introduces them to equations in Slope Intercept Form and guides them through scenarios that include graphing lines in that form and writing equations to model linear relationships. Students also learn about parallel and perpendicular lines. Near the end of the book, they learn how to graph linear inequalities. Student testimonials: This is the best way to learn math. Summit Math books are unlike typical textbooks. It doesn't matter how you learn or what speed you go at; you can learn at your own pace while still understanding all the material. Summit Math Books have guided me through algebra. They are the stepping stones of what it takes to think like a mathematician. I really enjoy learning from these books; they clearly demonstrate how concepts are built over other concepts. You don't just memorize; you actually understand it. Parent testimonials: Summit Math Books not only helped my daughter learn the math; they helped her to love learning math in and of itself. Summit Math books have a fun, self-paced way to explain math concepts. I am absolutely thrilled with this math program. The books are so well organized, and the content builds from one lesson to the next. We are really impressed and grateful for our boys' understanding of what the math means, not just how to get problems right. We should all learn to understand math this way. As the mother of a teenage daughter who previously had occasional difficulty in math, it was refreshing to watch her actually enjoy her math class and to understand the subject.
