2. Abundant Labor Supply (immigration)
3. Strong Governmental Policy (Railroad Grants)
4. New Sources of Power (electricity, petroleum, steel)

Major Technological Advancements: the Second Industrial Revolution: 1870s. Invention: telephone, air brake, and electric trolleys on the railroads. The Bessemer and open hearth processes in the steel mills, the telephone, electric light, and typewriter.

3. Explain how the Second Industrial Revolution shaped various regions of the US.

Northwest

The Northwest was at the center of industrialization during the First Industrial Revolution. It contained the leading industrial regions in the Second Industrial Revolution. New York, Massachusetts, and Pennsylvania produced more than 50 percent of all U.S. industrial products in 1890.

Almost 300,000 miles of railroad lines interconnected in the Northwest by 1890. The growth of railroads created a network of supporting industries. Coal mining, iron and steel, and machinery that were essential to the manufacture of machinery. The steel for use in the railroads and iron and steel manufacturing for the growth of the mining industry in the region.

This rapid growth of a manufacturing economy created a need for specific workers. Cities in the Northwest became industrial centers like the manufacturing hub of the United States. By 1870 about 25 percent of the U.S. population was foreign born. Most of the new immigrants were the immigrants. Most of these immigrants settled in the Northwest and the upper Midwest along the Great Lakes in Chicago.

The growth of industry also highlighted the gap between rich and poor in the region. Perhaps more than any other, the social, political, and economic differences between the rich and poor were highlighted for industrial growth. Workers without better wages and working conditions. Labor unions formed first in the United States. Miners and shipbuilders, and some of the first unions in the United States as a bargaining tool against business owners.

Southwest

The large region experienced dramatic growth in the mining and manufacturing. The upper Midwest states along the Great Lakes—Ohio, Indiana, and Illinois—became centers of industry and a hub for shipping and transport. Cities grew rapidly, attracting large numbers of immigrants. Chicago, Illinois became one of the nation's largest cities.

Since then, the course has been modified here and there, but very little has changed in AP textbooks: content is still king. Until now, *Fabric of a Nation* is the first book to truly embrace this dramatic shift in the AP course and in how history is taught. Built from the ground up by long-time AP leaders Jason Stacy and Matthew Ellington, this book offers a new approach to AP US History by seamlessly integrating a brief historical narrative, AP skills practice, primary source documents, exact alignment to the AP course, now that's revolutionary. *Psychology, Sixth Edition in Modules* David G.
