According to Osuolale (2014), a lot of factors contribute to the poor achievement of students in physics such as availability of teaching aids, ineffective learning strategies, learning environment etc. While other factors cannot be identified, studies have shown that if teaching-learning strategies are improved, achievement will be enhanced (Elvis, 2014; Oluwasegun, Raimond, 2012). Physics curriculum at secondary school level is broken down into mechanics, heat, waves, motion, light, electricity

and atomic Physics. Report from an external examiner (2016 and 2017) revealed a general weakness in the ability of students to answer questions in waves. Obafemi Onwioduokit (2013) found out that wave mechanics is the highest in level of difficulty by both teachers and students. The findings of this study agree with Fisher (2009) who found that concepts of projectile motion, simple harmonic motion and diffraction of light waves are difficult for the students. Waves is a branch of secondary school physics in Nigeria
