

S.E. AutoPilot

GENERATION 2

(with Follow-up Option)

The Control Unit

A reliable, high quality electronics package based on Wagner's long line of proven autopilots. The "Special Edition" offers an exceptional combination of value and performance. It is housed in a high impact, non-magnetic splashproof case.

Updated circuitry design now permits optional input from a rudder follow-up unit for use with unequal displacement steering cylinders or rudder angle indicators. Full follow-up electric steering controllers may also be used when a follow-up unit is installed.

The Compass

A large, fully gimballed magnetic compass ensures stability and system sensitivity. Two sizes, 5" (125 mm) and 7" (180 mm) are available from Wagner and are chosen according to overall vessel characteristics. They are easy reading and suitable for use as the main navigation compass or may be located in a remote position to avoid magnetic interference.

A precision flux-gate sensor is used as a heading reference. It is supplied with the Wagner compasses, or it may be mounted onto a customer's own compass.

The Drive Unit

The S.E. AutoPilot operates with either hydraulic or mechanical steering systems.

All Wagner hydraulic pumpsets are adjustable volume types so that the correct rudder speed can be set with a wide range of steering cylinder sizes. This permits the "fine tuning" necessary for optimum performance of an autopilot.

Control of relays and solenoids is featured. The S.E. AutoPilot may be economically retrofitted to existing drive units.

The Wagner PV100-XX-TR Pumpset
