Walmart Questions And Answers In Interview:

Walmart in China Anita Chan, 2011-11-15 Walmart and Made in China are practically synonymous Walmart imports some 70 percent of its merchandise from China Walmart is now also rapidly becoming a major retail presence there with close to two hundred Walmarts in more than a hundred Chinese cities What happens when the world's biggest retailer and the world's biggest country do business with each other In this book a group of thirteen experts from several disciplines examine the symbiotic but strained relationship between these giants The book shows how Walmart began cutting costs by bypassing its American suppliers and sourcing directly from Asia and how Walmart's sheer size has trumped all other multinationals in squeezing procurement prices and as a by product driving down Chinese workers wages China is also an inviting frontier for Walmart's global superstore expansion As China's middle class grows the chain's Western image and affordable goods have become popular Walmart's Arkansas headquarters exports to the Chinese stores a unique corporate culture and management ideology which oddly enough are reminiscent of Mao era Chinese techniques for promoting loyalty Three chapters separately detail the lives of a Walmart store manager a lower level store supervisor and a cashier Another chapter focuses on employees wages voluntary overtime and the stores strict labor discipline In 2006 the official Chinese trade union targeted Walmart which is antilabor in its home country and succeeded in setting up union branches in all the stores Walmart in China reveals the surprising outcome

Share Market Interview Questions and Answers - English

Navneet Singh, Here are some common interview questions and answers related to the share market

- 1 What is the share market
Answer The share market is a platform where buyers and sellers trade stocks also called shares of publicly listed companies It is a crucial component of the financial market providing companies with access to capital and investors with opportunities for growth and income through dividends and capital appreciation
- 2 What is the difference between the primary and secondary markets
Answer The primary market is where new securities are issued and companies raise capital by offering shares to the public for the first time typically through an Initial Public Offering IPO The secondary market is where existing securities are bought and sold among investors such as through the stock exchanges e.g. NYSE NASDAQ BSE
- 3 What is an IPO
Answer An Initial Public Offering IPO is the process by which a privately held company offers shares to the public for the first time thereby becoming a publicly traded company It helps the company raise capital for expansion or other business needs
- 4 What are blue chip stocks
Answer Blue chip stocks refer to shares of well established companies with a history of stable earnings reliable dividend payments and a strong market position These companies are usually leaders in their industries and their stocks are considered safe investments
- 5 Explain what a bull and bear market are
Answer A bull market refers to a market where prices of securities are rising or expected to rise It is characterized by investor optimism and confidence A bear market refers to a market where prices of securities are falling or expected to fall typically marked by pessimism and a negative outlook
- 6 What is market capitalization
Answer Market capitalization market cap is the total value

of a company's outstanding shares of stock. It is calculated by multiplying the current share price by the total number of outstanding shares. Market cap is used to assess a company's size and is often classified into categories such as large cap, mid cap, and small cap.

7 What are dividends? Answer: Dividends are payments made by a corporation to its shareholders, typically out of profits. They are usually paid quarterly and can be in the form of cash or additional shares. Dividends are a way for companies to share their profits with their investors.

8 What is technical analysis? Answer: Technical analysis involves analysing historical price and volume data of stocks to forecast future price movements. It uses various charts and indicators like moving averages, Relative Strength Index (RSI), and Bollinger Bands to identify trends and trading opportunities.

9 What is fundamental analysis? Answer: Fundamental analysis involves evaluating a company's financial health and performance by analysing its financial statements, management, industry position, and economic factors. Key metrics include earnings, revenue, growth, debt levels, and profit margins. This approach helps assess the intrinsic value of a stock.

10 What is the difference between stocks and bonds? Answer: Stocks represent ownership in a company, and shareholders can benefit from dividends and capital appreciation. Bonds are debt instruments issued by companies or governments. Bondholders receive fixed interest payments (coupons) and the principal amount when the bond matures. Bonds are generally considered safer than stocks.

11 What are stock exchanges? Answer: Stock exchanges are centralized platforms where securities are bought and sold. Examples include the New York Stock Exchange (NYSE), NASDAQ, London Stock Exchange (LSE), and Bombay Stock Exchange (BSE). These exchanges ensure transparency and facilitate fair trading of stocks.

12 What are risk management strategies in stock market investments? Answer: Some common risk management strategies include Diversification (spreading investments across different sectors and asset classes to reduce risk), Hedging (using financial instruments like options and futures to offset potential losses), Stop loss orders (setting a predetermined price at which to sell a stock to limit potential losses), Asset allocation (balancing the portfolio based on risk tolerance, time horizon, and financial goals).

13 What is a stock split? Answer: A stock split is when a company divides its existing shares into multiple new shares to lower the trading price per share while keeping the overall value unchanged. For example, in a 2 for 1 stock split, shareholders receive two shares for every one they currently own.

14 Explain the concept of a P/E ratio. Answer: The Price to Earnings (P/E) ratio is a measure of a company's stock price relative to its earnings per share (EPS). It is calculated by dividing the market price per share by the earnings per share. A high P/E ratio can indicate that the stock is overvalued, while a low P/E ratio may suggest it is undervalued.

15 What is a margin account? Answer: A margin account allows an investor to borrow money from a brokerage firm to purchase securities using their existing investments as collateral. While margin trading amplifies potential returns, it also increases the risk of losses if the value of the investment declines.

16 What is a trading volume? Answer: Trading volume refers to the number of shares or contracts traded in a given period, typically measured daily. High trading volume can indicate strong interest and liquidity in a particular stock, while low trading volume might suggest less investor interest.

17 What are ETFs? Answer: Exchange

Traded Funds Answer ETFs are investment funds that hold a diversified portfolio of assets like stocks bonds or commodities They trade on stock exchanges like individual stocks providing a way for investors to gain exposure to a wide range of assets with a single purchase 18 What is the role of a broker in the stock market Answer A broker is a licensed professional or firm that facilitates the buying and selling of securities on behalf of investors Brokers execute trades provide advice and may also offer research and analysis to assist in investment decisions

Business from the Inside Out Timothy Mohin,2017-09-08 Corporate responsibility is considered an oxymoron by much of society Corporations are among the least trusted of our institutions and the 2008 financial crisis BP s oil spill in the Gulf of Mexico and the collapse of the house of cards that was Enron have only added to public skepticism So at a time when trust in corporations has reached an all time low why is interest in corporate responsibility at an all time high A plausible explanation is that increasing numbers of stakeholders are demanding responsibility from corporations Hyper transparency of corporate activities fueled by disclosure laws and the Internet has increased awareness to the point where corporate behavior is under

constant scrutiny Smart business leaders are aware of this scrutiny and of the high costs of a public scandal They know that in the long run it is cheaper to act responsibly now than to dig out from a PR disaster later Tim Mohin is a veteran corporate responsibility practitioner who has led programs at Apple Intel and AMD In this book Tim tells us why he believes he is making a difference where it counts and how others can do the same His book is a manual on how to steer the corporate supertanker toward doing good for people and our planet Changing Business from the Inside Out provides a fascinating roadmap to the corporate responsibility and sustainability field from beginning a career to forming a program to navigating the complicated politics of a corporation Mohin likens the corporate treehugger role to being the designated driver at the corporate cocktail party Throughout his book he argues strongly that activists can accomplish more for the planet and society by serving as a voice of responsibility within the corporation rather than protesting outside the factory gates Corporations are clearly the drivers of the world economy and the corporate responsibility practitioner has an essential role in bringing ethical and sustainable values to the C suite and making sure that they are accomplished Whether you are a practitioner needing advice a mid career professional wanting to change course or an MBA wondering how to incorporate responsibility into your career this book has the answers you need
