suggesting possible future directions of practical solutions and policy development for the attainment of inclusive social and economic justice for Zimbabweans

Validating Technological Innovation David Coniam, Peter Falvey, 2016-04-02 This book discusses Hong Kong's use of onscreen marking OSM in public examinations. Given that Hong Kong leads the way in OSM innovation, this book has arisen from a recognised need to provide a comprehensive coherent account of the findings of various separate but linked validation studies of onscreen public examinations in Hong Kong. The authors discuss their experience of the validation process, demonstrating how high stakes innovation should be fully validated by a series of research studies in order to satisfy key stakeholders.

Code-Switching as a Pedagogical Tool in Bilingual Classrooms Miriam Chitiga, 2021-11-29 Presenting a mixed methods study conducted in a bilingual mathematics classroom in Zimbabwe, this text reveals the semantic pedagogical functions and linguistic forms of code switching during STEM instruction. Code Switching as a Pedagogical Tool in Bilingual Classrooms offers a detailed analysis of code switching in the context of educational linguistics and reveals ten major pedagogical techniques which illustrate how teachers use code switches to engage students and provide guidance, clarification, discipline and recaps during individual and whole class interactions. Chapters highlight that code switching can be used in a targeted manner to harness the cognitive potential of bilingual speakers and enhance instruction. Ultimately, the text identifies implications for teacher education, language policy and educational leadership more broadly and demonstrates intersections with key areas including functional critical and cultural literacy. This text will benefit researchers, academics and educators with an interest in bilingualism, applied linguistics and secondary education more broadly. Those specifically interested in multicultural education, sociolinguistics and educational policy will also benefit from this book.

Perspectives in Curriculum Studies A Zama, N. Endeley, 2021-08-19 *Perspectives in Curriculum Studies* by Margaret Nalova Endeley and Martha Ashuntantang Zama is a comprehensive textbook for graduate students of Curriculum Studies and Instruction and a guide for education practitioners wherein they articulate contemporary curriculum concepts, principles and applications in the field. With illustrations from informed African perspectives, the authors situate curriculum theory and practice in local contexts so that African scholars, educators and others may be equipped with knowledge and skills to develop and maintain appropriate and relevant curricula for quality education. Framed in sixteen chapters grouped in five parts, the text begins with the exposition of basic terminology, curriculum theory and foundations of the curriculum, before delving profoundly into the curriculum development process. The latter portion gives the reader the opportunity to explore, analyse and evaluate different curriculum planning approaches and models, curriculum design dimensions and patterns and procedures for the development of syllabuses, textbooks and other curriculum materials. Also, Curriculum implementation tasks as well as strategies for evaluation of programs and courses are presented and discussed. Since curriculum and instruction are highly intertwined notions, instructional design is elaborately treated in two chapters, bringing out its theoretical underpinnings and procedures. The book closes with global perspectives.

of curriculum development in practice The goal here is to provide insights into trends issues and challenges not only in curriculum development but also in the curriculum field which should generate action towards the improvement of curriculum practice and spur the search for new knowledge
