Ross,2013-03-09 Goals and Emphasis of the Book Mathematicians

have begun to find productive ways to incorporate computing power into the mathematics curriculum There is no attempt here to use computing to avoid doing differential equations and linear algebra The goal is to make some first ex plorations in the subject accessible to students who have had one year of calculus Some of the sciences are now using the symbol manipulative power of Mathemat ica to make more of their subject accessible This book is one way of doing so for differential

equations and linear algebra I believe that if a student's first exposure to a subject is pleasant and exciting then that student will seek out ways to continue the study of the subject The theory of differential equations and of linear algebra permeates the discussion Every topic is supported by a statement of the theory But the primary thrust here is obtaining solutions and information about solutions rather than proving theorems There are other courses where proving theorems is central The goals of this text are to establish a solid understanding of the notion of solution and an appreciation for the confidence that the theory gives during a search for solutions Later the student can have the same confidence while personally developing the theory

Advanced Engineering Mathematics H. C. Taneja, 2008-07 The text has been divided in two volumes Volume I Ch 1-13 Volume II Ch 14-22 In addition to the review material and some basic topics as discussed in the opening chapter the main text in Volume I covers topics on infinite series differential and integral calculus matrices vector calculus ordinary differential equations special functions and Laplace transforms Volume II covers topics on complex analysis Fourier analysis partial differential equations and statistics The present book has numerous distinguishing features over the already existing books on the same topic The chapters have been planned to create interest among the readers to study and apply the mathematical tools The subject has been presented in a very lucid and precise manner with a wide variety of examples and exercises which would eventually help the reader for hassle free study
