Corruption in Society Abdul Karim Bangura,James T. Gire,2023-05-15 Corruption in Society Multidisciplinary Conceptualizations is the first book to address the notion of corruption in a truly multidisciplinary manner augmented with empirical evidence The prevalent definition in books and articles on corruption is that it is a dishonest or fraudulent conduct by those with political and or economic power typically involving bribery This political economy or public choice denotation while very useful is inadequate for a comprehensive understanding of the concept because the notion of corruption appears in every discipline For example in the field of chemistry chemical corruption concerns a the incorporation of defective compounds into experiments to better simulate conditions on the early Earth and to help us understand how the first molecules of life formed and b how to make chemicals appear safer sometimes dodging restrictions on their use by minimizing the estimates of how much is released into the environment In order to address this shortcoming this book provides a discipline by discipline conceptualization of corruption buttressed with evidence from the discipline

(ed),Mafongoya, P.L. (ed),2017-11-15 Climate change presents a profound challenge to food security and sustainable development in Africa Its negative impacts are likely to be greatest in the African region which is already food insecure In the face of global climate change and its emerging challenges and unknowns it is essential that decision makers base policies on the best available knowledge In recent years the knowledge of local and indigenous people often referred to as indigenous knowledge IK has been increasingly recognised as an important source of climate knowledge and adaptation strategies **Millet** Latika Yadav,Upsana Upsana,2024-01-31 Millets are a group of small seeded grasses that have been grown as food sources for humans and animals since ancient times These crops are highly nutritious and have a range of health benefits They are also highly adaptable to different growing conditions making them an important crop for

farmers in arid and drought prone regions Millets have been an integral part of the traditional diets of many cultures around the world and have gained renewed attention in recent years as a sustainable low input alternative to other cereal crops Despite their many benefits millets have been largely overlooked by modern industrial agriculture and their cultivation and use have declined in many regions There is a growing recognition of the need to promote and support the conservation and revival of millet cultivation as a key strategy to enhance food security and resilience in the face of climate change
