Zimsec O Level Human And Social Biology 2015:

Transformational Human Resources Management in Zimbabwe Mervis Chiware, Bernard Nkala, Innocent Chirisa, 2022-09-19 This book is a stepping stone toward solving public sector human capital challenges in Zimbabwe as it equips human capital managers with solutions to key issues in the public sector. In Zimbabwe, the public sector human capital drives the economy as over half of the population access their services through public enterprises. Government is the major agent in economic and infrastructure development as well as the production of goods and services. However, Zimbabwe's public service is underperforming due to poorly motivated and managed employees who do not respond to the needs of its clients. This is a cause of concern as the public sector human capital is central to the overall performance of the public sector. Often, public sector managers and leaders lack advanced relevant and dynamic skills and knowledge to deal with human resource challenges within the New Public Management environment. It is critical for the public sector to transform its human resource management to suit twenty-first century needs. Effective human resource management in the public sector leads to economic growth and therefore the achievement of the Zimbabwe National Vision 2030. Therefore, this book serves as a guide for public sector managers and those directly or indirectly involved in human capital management. It provides in-depth knowledge and guidance in effective human capital management within the context of the public sector in Zimbabwe.

Cheetahs: Biology and Conservation, 2017-11-28 Cheetahs Biology and Conservation reports on the science and conservation of the cheetah. This volume demonstrates the interdisciplinary nature of research and conservation efforts to study and protect the cheetah. The book begins with chapters on the evolution, genetics, physiology, ecology, and behavior of the species, as well as distribution reports from range countries. These introductory chapters lead into discussions of the challenges facing cheetah survival, including habitat loss, declining prey base, human-wildlife conflict, illegal trade, and newly emerging threats, notably climate change. This book also focuses on conservation strategies and solutions, including environmental education and alternative livelihoods. Chapters on the role of captive cheetahs to conservation and the long-term research of the species are included, as are a brief discussion of the methods and analyses used to study the cheetah. The book concludes with the conservation status and future outlook of the species. Cheetahs Biology and Conservation is a valuable resource for the regional and global communities of cheetah conservationists, researchers, and academics. Although cheetah-focused, the book provides information relevant to the study of broader topics such as wildlife conservation, captive breeding, habitat management, conservation biology, and animal behaviour. Cover photograph by Angela Scott. Includes chapters by the world's leading cheetah researchers and practitioners who have focused their efforts on this high-profile species of conservation concern. Provides findings as a combination of scientific detail and basic explanations so that they can be available not only to cheetah researchers and conservationists but also to policy makers, business leaders, zoo managers, academics, students, and people interested in the cheetah and its future. Presents the current knowledge of the species.

Governance in International and Comparative Perspective Peter F. Haruna, Laila El Baradei, Liza van Jaarsveldt, Abraham D. Benavides, Cristina M. Stanica, 2024-05-01 This book pulls literature together to examine the quality of climate governance based in the experience of Global South regions Africa Latin America and Caribbean While these regions are resilient the IPCC 2022 Report indicates that the effects of climate change are crippling their thinly structured governance systems and limited capacities For example in addition to environmental devastation loss of life and livelihoods these regions have endured most of the loss and damage due to climate change impacts How are they responding What are the outcomes And where do they go from here Given this background the book's goal is to question assumptions about climate governance patterns systems institutions and processes in these regions using comparative analytical techniques while distilling information about policy outcomes that other approaches do not provide It argues that these regions and individual countries within them have a lot to learn from and about each other rather than look to the Global North and wealthy countries for economic political and administrative models that hardly match their lived experience and ontological outlooks In doing so it aspires to promote a fruitful South South policy related dialogue via scholarly exchanges and also contribute to advance the study and practice of international and comparative public administration From this perspective scholars researchers educators public managers and practitioners will find the book relevant to and useful for their respective endeavors **Conservation Agriculture in Africa** Saidi Mkomwa, Amir H. Kassam, 2022-01-11 Tillage

agriculture has led to widespread soil and ecosystem degradation globally and more particularly in the developing regions This is especially so in Africa where traditional agricultural practices have become unsustainable due to severe exploitation of natural resources with negative impacts on the environment and food system In addition agricultural land use in Africa today faces major challenges including increased costs climate change and a need to transform to more sustainable production intensification systems Conservation Agriculture has emerged as a major alternative sustainable climate smart agriculture approach in Africa and has spread to many African countries in the past decade as more development and research including in sustainable mechanization has enabled its extension and uptake It is key to transforming Africa's
