Computer Algebra Handbook Johannes Grabmeier, Erich Kaltofen, Volker Weispfenning, 2012-12-06 Two ideas lie gleaming on the jeweler's velvet The first is the calculus the second the algorithm The calculus and the rich body of mathematical analysis to which it gave rise made modern science possible but it has been the algorithm that has made possible the modern world David Berlinski The Advent of the Algorithm First there was the concept of integers then there were symbols for integers I II III 1 1 1 1 f t t t what might be called a sticks and stones representation I II III IV V Roman numerals 1 2 3 4 5 Arabic numerals etc Then there were other concepts with symbols for them and algorithms sometimes for manipulating the new symbols Then came collections of mathematical knowledge tables of mathematical computations theorems of general results Soon after algorithms came devices that provided assistance for carrying out computations Then mathematical knowledge was organized and structured into several related concepts and symbols logic algebra analysis topology algebraic geometry number theory combinatorics etc This organization and abstraction lead to new algorithms and new fields like universal algebra But always our symbol systems reflected and influenced our thinking our concepts and our algorithms

Microstrip Filters for RF / Microwave Applications Jia-Sheng Hong,2011-01-06 The first edition of Microstrip Filters for RF Microwave Applications was published in 2001 Over the years the book has been well received and is used extensively in both academia and industry by microwave researchers and engineers From its inception as a manuscript the book is almost 8 years old While the fundamentals of filter circuits have not changed further innovations in filter realizations and other applications have occurred with changes in the technology and use of new fabrication

processes such as the recent advances in RF MEMS and ferroelectric films for tunable filters the use of liquid crystal polymer LCP substrates for multilayer circuits as well as the new filters for dual band multi band and ultra wideband UWB applications Although the microstrip filter remains as the main transmission line medium for these new developments there has been a new trend of using combined planar transmission line structures such as co planar waveguide CPW and slotted ground structures for novel physical implementations beyond the single layer in order to achieve filter miniaturization and better performance Also over the years practitioners have suggested topics that should be added for completeness or deleted in some cases as they were not very useful in practice In view of the above the authors are proposing a revised version of the Microstrip Filters for RF Microwave Applications text and a slightly changed book title of Planar Filters for RF Microwave Applications to reflect the aforementioned trends in the revised book

Power System Modelling and Scripting Federico Milano,2010-09-08 Power system modelling and scripting is a quite general and ambitious title Of course to embrace all existing aspects of power system modelling would lead to an encyclopedia and would be likely an impossible task Thus the book focuses on a subset of power system models based on the following assumptions i devices are modelled as a set of nonlinear differential algebraic equations ii all alternate current devices are operating in three phase balanced fundamental frequency and iii the time frame of the dynamics of interest ranges from tenths to tens of seconds These assumptions basically restrict the analysis to transient stability phenomena and generator controls The modelling step is not self sufficient Mathematical models have to be translated into computer programming code in order to be analyzed understood and experienced It is an object of the book to provide a general framework for a power system analysis software tool and hints for filling up this framework with versatile programming code This book is for all students and researchers that are looking for a quick reference on power system models or need some guidelines for starting the challenging adventure of writing their own code
