measures or other reasons such as transfer of aquaculture products to other areas Having early warning systems could help mitigate the impact of HABs and reduce the occurrence of HAB events The Joint FAO IOC IAEA technical guidance for the implementation of early warning systems EWS for HABs will guide competent authorities and relevant institutions involved in consumer protection or environmental monitoring to implement early warning systems for HABs present in their areas marine and brackish waters specifically those affecting food safety or food security benthic HABs fish killing HABs pelagic toxic HABs and cyanobacteria HABs The guidance provides a roadmap for stakeholders on how to improve or implement an EWS for HABs and biotoxins where appropriate It is important to note that not all countries and institutions can implement the same level of EWS for HABs and this guidance is intended mainly for those who seek to broaden existing early warning systems or who are just beginning to consider putting a system in place
