

Transformations of Quadratic Functions

How do the constants a , h , and k affect the graph of the quadratic function: $f(x) = a(x - h)^2 + k$

$$f(x) = \pm a(x - h)^2 + k$$

Constant	Examples (Graph them...)	Visual Representation	Describe what changed...
k	$f(x) = x^2$ $g(x) = x^2 + 3$ $h(x) = x^2 - 5$ $j(x) = x^2 + 2$ $k(x) = x^2 - 4$		Changing the value of k shifts the graph <u>up</u> or <u>down</u> . If k is positive the graph shifts <u>up</u> . If k is negative the graph shifts <u>down</u> .
h	$f(x) = x^2$ $g(x) = (x - 3)^2$ $h(x) = (x + 2)^2$ $j(x) = (x - 1)^2$ $k(x) = (x + 4)^2$		Changing the value of h shifts the graph <u>left</u> or <u>right</u> . If h is positive the graph shifts <u>right</u> . If h is negative the graph shifts <u>left</u> .

A novel decision probability transformation method based on belief interval Zhan Deng, Jianyu Wang, In Dempster Shafer evidence theory the basic probability assignment BPA can effectively represent and process uncertain information How to transform the BPA of uncertain information into a decision probability remains a problem to be solved In the light of this issue we develop a novel decision probability transformation method to realize the transition from the belief decision to the probability decision in the framework of Dempster Shafer evidence theory The newly proposed method considers the transformation of BPA with multi subset focal elements from the perspective of the belief interval and applies the continuous interval argument ordered weighted average operator to quantify the data information contained in the belief interval for each singleton Afterward we present an approach to calculate the support degree of the singleton based on quantitative data information According to the support degree of the singleton the BPA of multi subset focal elements is allocated reasonably Furthermore we introduce the concepts of probabilistic information content in this paper which is utilized to evaluate the performance of the decision probability transformation method Eventually a few numerical examples and a practical application are given to demonstrate the rationality and accuracy of our proposed method
