Cycles of Time and Meaning in the Mexican Books of Fate Elizabeth Hill Boone, 2007-02-01 In communities throughout precontact Mesoamerica calendar priests and diviners relied on pictographic almanacs to predict the fate of newborns to guide people in choosing marriage partners and auspicious wedding dates to know when to plant and harvest crops and to be successful in many of life's activities. As the Spanish colonized Mesoamerica in the sixteenth century they made a determined effort to destroy these books in which the Aztec and neighboring peoples recorded their understanding of the invisible world of the sacred calendar and the cosmic forces and supernaturals that adhered to time. Today only a few of these divinatory codices survive. Visually complex, esoteric and strikingly beautiful painted books such as the famous Codex Borgia and Codex Borbonicus still serve as portals into the ancient Mexican calendrical systems and the cycles of time and meaning they encode. In this comprehensive study Elizabeth Hill Boone analyzes the entire extant corpus of Mexican divinatory codices and offers a masterful explanation of the genre as a whole. She introduces the sacred divinatory calendar and the calendar priests and diviners who owned and used the books. Boone then explains the graphic vocabulary of the calendar and its prophetic forces and describes the organizing principles that structure the codices. She shows how they form almanacs that either offer general purpose guidance or focus topically on specific aspects of life such as birth, marriage, agriculture and rain, travel and the forces of the planet Venus. Boone also tackles two major areas of controversy: the great narrative passage in the Codex Borgia which she freshly interprets as a cosmic narrative of creation and the disputed origins of the codices which she argues grew out of a single religious and divinatory system.

Reading the Bible in Ancient Traditions and Modern Editions Andrew B. Perrin, Kyung S. Baek, Daniel K. Falk, 2017-11-17 A collection of essays commemorating the career contributions of Peter W. Flint. An international group of scholars specializing in various disciplines of biblical studies: Dead Sea Scrolls, Septuagint, Hebrew Bible, Old Testament, Second Temple Judaism and Christian origins present twenty-seven new contributions that commemorate the career of Peter W. Flint, 1951-2016. Each essay interacts with and gives fresh insight into a field shaped by Professor Flint's life work. Part 1 explores the interplay between text-critical methods, the growth and formation of the Hebrew Scriptures and the making of modern critical editions. Part 2 maps dynamics of scriptural interpretation and reception in ancient Jewish and Christian literatures of the Second Temple period. Features essays that assess the state of the field and reflect on the methods, aims and best practices for textual criticism and the making of modern critical text editions. Demonstrations of how the processes of scriptural composition, transmission and reception converge and may be studied together for mutual benefit. Clarification of the state forms of scripture in antiquity and how scripture was extended, rewritten and recontextualized by ancient Jewish and Christian scribes and communities.

Empirical modelling of translation and interpreting Hansen-Schirra, Silvia, Czulo, Oliver, Hofmann, Sascha, 2017 Empirical research is carried out in a cyclic way approaching a research area

bottom up data lead to interpretations and ideally to the abstraction of laws on the basis of which a theory can be derived Deductive research is based on a theory on the basis of which hypotheses can be formulated and tested against the background of empirical data Looking at the state of the art in translation studies either theories as well as models are designed or empirical data are collected and interpreted However the final step is still lacking so far empirical data has not lead to the formulation of theories or models whereas existing theories and models have not yet been comprehensively tested with empirical methods This publication addresses these issues from several perspectives multi method product as well as process based research may gain insights into translation as well as interpreting phenomena These phenomena may include cognitive and organizational processes procedures and strategies competence and performance translation properties and universals etc Empirical findings about the deeper structures of translation and interpreting will reduce the gap between translation and interpreting practice and model and theory building Furthermore the availability of more large scale empirical testing triggers the development of models and theories concerning translation and interpreting phenomena and behavior based on quantifiable replicable and transparent data *Time and the Shape of History* P. J. Corfield, 2007-01-01 In this lively comedy of love and money in sixteenth century Venice Bassanio wants to impress the wealthy heiress Portia but lacks the necessary funds He turns to his merchant friend Antonio who is forced to borrow from Shylock a Jewish moneylender When Antonio s business falters repayment becomes impossible and by the terms of the loan agreement Shylock is able to demand a pound of Antonio s flesh Portia cleverly intervenes and all ends well except of course for Shylock

Translation Peter France, 2000 Translation has been a crucial process in world culture over the past two millennia and more In the English speaking cultures many of the most important texts are translations from Homer to Beckett the Bible to Freud Although recent years have seen a boom in translation studies there has been no comprehensive yet convenient guide to this essential element of literature in English Written by eminent scholars from many countries the Oxford Guide to Literature in English Translation meets this need and will be essential reading for all students of English and comparative literature It highlights the place of translation in our culture encouraging awareness of the issues raised making the translator more

visible Concentrating on major writers and works it covers translations out of many languages from Greek to Korean from Swahili to Russian For some works e g Virgil s Aeneid which have been much translated the discussion is historical and critical showing how translation has evolved over the centuries and bringing out the differences between versions Elsewhere with less familiar literatures the Guide examines the extent to which translation has done justice to the range of work available The Guide is divided into two parts Part I contains substantial essays on theoretical questions a pioneering outline of the history of translation into English and discussions of the problems raised by specific types of text e g poetry oral literature The second much longer part consists of entries grouped by language of origin some are devoted to individual texts e g the Thousand and One Nights or writers e g Ibsen Proust but the majority offer a critical overview of a genre e g Chinese poetry Spanish Golden Age drama or of a national literature e g Hungarian Scottish Gaelic There is a selective bibliography for each entry and an index of authors and translators

Towards a Social Bioarchaeology of the Mycenaean Period Ioanna Moutafi, 2021-06-09 This book investigates the complex relationship between funerary treatment and wider social dynamics through a contextual analysis of human skeletal remains and associated mortuary data from Voudeni an important Mycenaean 1450 1050 BC chamber tomb cemetery in Achaea Greece Voudeni is one of the most significant sites of Achaea thoroughly investigated under the direction of the Honorary General Director of Antiquities Dr Lazaros Kolonas Over 60 chamber tombs spanning the entire Late Helladic III period have been excavated yielding an unprecedented wealth of biocultural information This study explores the post mortem treatment of the body in the Voudeni cemetery through a novel interpretive approach that transcends unproductive cross disciplinary divisions This biosocial approach integrates traditional archaeology current reflections in mortuary archaeological theory and cutting edge bioarchaeological methods primarily focused on funerary taphonomy and archaeoethnology of commingled skeletal assemblages The author proposes that the most effective route to explore the social dimensions of mortuary data is through an emic understanding of historically situated actions and experiences both of the living actors the mourners and of the dead themselves Human skeletal remains are used as the primary strand of evidence both as the object of the acts of the living and the subject of their own lived experiences Most importantly this study aspires to show how reconciliation between abstract theoretical advances and empirical biocultural data may be possible providing the most insightful path to a better

understanding of the archaeological mortuary record The book provides a thorough background on Mycenaean mortuary research and explores the topic in successive stages a theoretical and methodological framework b detailed taphonomic analysis and osteological results of 20 tombs c multivariate analysis of bio cultural data across socio temporal parameters with special emphasis on the distinction between the palatial LHIIIA B and the transitional post palatial LHIIIC period and d final synthesis addressing questions pertaining to changing social conditions in Achaea and key issues of current Mycenaean mortuary research These include tomb re use form diversity sequence and frequency of mortuary activities mortality profiles differential inclusion visibility and funerary treatment of different groups identities changes in treatment of the dead body reflecting shifts in notions of the self and social relationships The results shed new light on social developments in Mycenaean Achaea showing that the complex interaction between changing social conditions and mortuary practice is often reflected in subtle yet meaningful shifts of emphasis in the post mortem treatment of bodies and bones rather than in blatant radical changes

Words in Time Regine Eckardt, Klaus von Heusinger, Christoph Schwarze, 2011-05-09 Meanings of words are constantly changing and the forces driving these changes are varied and diverse Linguistic analyses are usually concerned with language internal processes while investigations of language external historical developments tend to disregard linguistic considerations It is evident however that an investigation of diachronic semantics will have to consider both sides a specific theory of meaning including a proper place for lexical semantics on the one hand and incorporate knowledge about the world and the social and cultural environment of speakers who use language as a tool for communication on the other The collection focuses on meaning change as a topic of interdisciplinary research Distinguished scholars in diachronic semantics general linguistics classical philology philosophy of language anthropology and history offer in depth studies of language internal and external factors of meaning change This broad range of perspectives unprecedented in research publications of recent years is a pioneering attempt to mirror the multi facetteous nature of language as a formal social cognitive cultural and historical entity The contributions each exploring the research issues methods and techniques of their particular field are directed towards a broader audience of interested readers thus enhancing interdisciplinary exchange
