Make: Radio Fredrik Jansson, 2024-05-31 Radio waves are all around us. They're used by cell phones, Wi-Fi routers, TV dishes, and even satellite networks to convey data on thousands of different frequencies. When we unlock a car door with the push of a button or stream music to wireless earbuds, that's radio. It's a simple yet dynamic technology that has been harnessed by creative experimenters for over a century, and now you can join the adventure. Author Fredrik Jansson demystifies the world of radio through a dozen innovative projects enabling readers to build inexpensive radio circuits such as transmitters and receivers, remote controls, and a working metal detector. Radio concepts are also adapted for the Raspberry Pi Pico, updating classic concepts with contemporary tools for accuracy and power. With more than 150 color images, step-by-step instructions, and detailed explanations, and a handy materials list of components and sources, this is the ultimate guide to explore the hidden universe of radio waves. *Short-range Wireless Communication* Alan

Bensky, 2004-03-05 The Complete Tool Kit for the Hottest Area in RF Wireless Design. Short range wireless communications over distances of less than 100 meters is the most rapidly growing segment of RF wireless engineering. Alan Bensky is an internationally recognized expert in short range wireless, and this new edition of his bestselling book is completely revised to cover the latest developments in this fast-moving field. You'll find coverage of such cutting-edge topics as architectural trends in RF wireless, integrated circuits, compatibility and conflict issues between different short range wireless systems, Zigbee, and related new IEEE standards for short range communications, latest U.S. and international regulatory standards for spread spectrum, ultra wideband, and other advanced communications techniques. Alan Bensky also thoroughly discusses the fundamentals of radio signal propagation, communications protocols, and modulation methods, information theory, antennas, and transmission lines, receivers, transmitters, radio system design, and how to successfully implement a short range wireless system. All material has been carefully updated and revised to make it as technically up to the minute as possible. You'll also find coverage of Bluetooth, Wi-Fi, and related 802.11 variants, digital modulation methods, and other essential information for planning and designing short range wireless hardware and networks. This new edition will, like the first edition, be an invaluable reference for engineers and technical professionals who design, support, market, and maintain short range wireless communications systems. No other book contains EVERYTHING pertaining to short range wireless design. Covers all the hot topics like 802.11, Zigbee, Wi-Fi, and Bluetooth. *Biotelemetry X* Charles J. Neurotechnology for Biomimetic Robots Joseph Ayers,Joel L. Davis,Alan Rudolph,2002 An overview of neurotechnology the engineering of robots based on animals and animal behavior The goal of neurotechnology is to confer the performance advantages of animal systems on robotic machines Biomimetic robots differ from traditional robots in that they are agile relatively cheap and able to deal with real world environments The engineering of these robots requires a thorough understanding of the biological systems on which they are based at both the biomechanical and physiological levels This book provides an in depth overview of the field The areas covered include myomorphic actuators which mimic muscle action neuromorphic sensors which like animal sensors represent sensory modalities such as light pressure and motion in a labeled line code biomimetic controllers based on the relatively simple control systems of invertebrate animals and the autonomous behaviors that are based on an animal s selection of behaviors from a species specific behavioral library The ultimate goal is to develop a truly autonomous robot one able to navigate and interact with its environment solely on the basis of sensory feedback without prompting from a human operator
