clinical process cleaning applications that form part of our everyday lives most people are not aware of their existence and
yet without them many of the services and products we take for granted would not be available Most chapters include case
studies of various cleaning problems together with the solutions offered Emphasis is placed on the practical aspects of
designing manufacturing and operating cleaning equipment this includes a detailed examination of traditional cleaning
methods and considers a number of lessor known techniques that have been developed over recent years together with a
glimpse of the future trends in the industry In addition to the actual cleaning techniques the book examines the effect of
increasing international health safety training and environmental legislation together with regulations that control cleaning
standards in the pharmaceuticals cosmetics food and drinks manufacturing industries In this respect the book is not intended
to be a definitive reference book Legislation and regulations are continually being upgraded particularly those relating to
European Directives No apologies are given for the fact that the reader will be continually reminded of the need to obtain up
to date copies of the various documents referred to and to secure expert advice on those issues that are crucial in terms of
health safety and hazardous conditions To assist the reader useful information sources are listed in the reference section
