

Similarity Transformations – Dilations combined with other transformations

To prove that two shapes are similar on a coordinate plane, dilate the pre-image and translate/reflect/rotate until you map the pre-image onto the image. Apply similarity transformations to the following two pre-image/images. Apply the transformations to the necessary coordinate points, and draw each transformed shape as you go.

Step 1 – Dilate (SF = _____)

$(x, y) \rightarrow (\quad , \quad)$

$A(\quad , \quad) \rightarrow A'(\quad , \quad)$

$B(\quad , \quad) \rightarrow B'(\quad , \quad)$

$C(\quad , \quad) \rightarrow C'(\quad , \quad)$

Step 2 – Reflect

$(x, y) \rightarrow (\quad , \quad)$

$A'(\quad , \quad) \rightarrow A''(\quad , \quad)$

$B'(\quad , \quad) \rightarrow B''(\quad , \quad)$

$C'(\quad , \quad) \rightarrow C''(\quad , \quad)$

Step 3 – Translate

$(x, y) \rightarrow (\quad , \quad)$

$A''(\quad , \quad) \rightarrow A'''(\quad , \quad)$

$B''(\quad , \quad) \rightarrow B'''(\quad , \quad)$

$C''(\quad , \quad) \rightarrow C'''(\quad , \quad)$

Step 1 – Dilate (SF = _____)

$(x, y) \rightarrow (\quad , \quad)$

$F(\quad , \quad) \rightarrow F'(\quad , \quad)$

Step 2 – Translate

$(x, y) \rightarrow (\quad , \quad)$

$F'(\quad , \quad) \rightarrow F''(\quad , \quad)$

How did you determine the scale factor for the circle transformation?

Note – The order of transformations is not important as long as your pre-image is mapped onto your image. Dilated first is recommended, but not necessary!

Frey, 2005-05-18

The study of group communication has never been more critical as recent national and international events point to the fragility of group life. An emerging perspective, the bona fide group perspective, offers hope for improving group communication for it recognizes that any group—a family, community group, expedition team, social support group, organizational work group, interorganizational collaboration, or international team—must be studied and understood within the multiple contexts in which it is embedded and that significantly affects who is considered to be part of a group, what occurs within that group, and how that group interacts with other groups. In the second edition of his award-winning volume, editor Lawrence R. Frey showcases original research studies conducted on and about communication in bona fide groups, demonstrating the conceptual promise of the bona fide group perspective as realized in research practice. Divided into six sections, the chapters cover a wide range of new or relatively understudied groups, including youth, community, groups, Internet support groups, climbing, expedition groups, families, neighborhoods, and school boards, and demonstrate the wealth of methodological approaches that can be used to study bona fide group communication, including survey methods, interviews, textual analysis, content analysis, participant observation, and discourse analysis.

Group Communication in Context: Studies of Bona Fide Groups, Second Edition shows that the bona fide group perspective has the power to transform our thinking about groups and group communication and in time the practices in which groups and group members engage. The volume is intended for use in group communication courses as well as a reference for group scholars. It is also appropriate for classes in psychology, social work, counseling, sociology, anthropology, and related disciplines.
