The Encyclopaedia Britannica: Index, 1911. The last great work of the age of reason, the final instance when all human knowledge could be presented with a single point of view. Unabashed optimism and unabashed racism pervades many entries in the 11th and provide its defining characteristics. Despite its occasional ugliness, the reputation of the 11th persists today because of the staggering depth of knowledge contained within its volumes. It is especially strong in its biographical entries. These delve deeply into the history of men and women prominent in their eras who have since been largely forgotten except by the historians and scholars. Functional Foods, Ageing and Degenerative Disease C Remacle, B Reusens, 2004-06-09. Degenerative diseases linked to ageing populations are a growing problem for the developed world. Edited by two authorities, this important collection reviews the role of functional foods in helping to prevent a number of such degenerative conditions from osteoporosis and obesity to immune system disorders and cancer. The book begins with a number of introductory chapters which discuss the regulation of functional foods in the EU, the role of diet generally in preventing degenerative disease. Part one then examines bone and oral health with chapters on the use of diet to control osteoporosis, the use of functional ingredients to improve bone strength and ways of maintaining dental health. Part two discusses how obesity can be controlled whilst part three looks at gut health and maintaining the immune function using functional ingredients such as probiotics and prebiotics. The final part of the book reviews research on functional foods and cancer with chapters on synbiotics, anti-angiogenic functional foods, glucosinolates, dietary fibre and phytoestrogens. Functional foods, ageing and degenerative disease is a standard reference for all those concerned with the role of functional foods in the prevention and control of degenerative disease. Explores diet strategies for preventing diseases including osteoporosis. Summarises key management techniques for obesity, irritable bowel syndrome and oral health. Presents the role of functional foods in promoting good health.
