Understanding Experiences of First Generation University Students Amani Bell, Lorri J. Santamaría, 2018-02-22

Over the past few decades universities have opened their doors to students whose parents and grandparents were historically excluded from societal participation and higher education for reasons associated with racial ethnic socio economic and or linguistic diversity Many of these students are first generation or first in their family to attend university While some progress has been made in responding to the needs of these internationally underserved learners many challenges remain This edited book features the unique and diverse experiences of first generation students as they transition into and engage with higher education whilst exploring ways in which universities might better serve these students With reference to culturally responsive and sustaining research methodologies undertaken in Australia Canada New Zealand South Africa the UK and the USA the contributors critically examine how these students demonstrate resilience within university and ways in which success and challenges are articulated Elements that are unique to context and shared across the international higher education milieu are explored The book is replete with diverse student voices and compelling implications for practice and future research The studies featured are centred on underlying theories of identity and intersectionality while valuing student voices and experiences Throughout the emphasis is on using strengths based indigenous and decolonised methodologies Through these culturally sustaining approaches which include critical incident technique participatory learning and action talanoa and narrative inquiry the book explores rich data on first generation student experiences at seven institutions in six countries across four continents Breaking a Rainbow, Building a Nation

Rekgotsofetse Chikane, 2018-10-01 Breaking a Rainbow Building a Nation is a first hand account of the university protests that gripped South Africa between 2015 and 2017 widely better known as the FeesMustFall Chikane outlines the nature of student politics in the country before during and after the emergence of MustFall politics exploring the political dynamics that informed and drove the student protests and the effect that these MustFall movements have had on the nature of youth politics in the country Chikane looks at how the current nature of youth politics is different from previous youth upheavals that have defined South Africa specifically due to the fact that the protests were being led by so called coconuts who are part

of the black elite Breaking a Rainbow Building a Nation poses the provocative question can coconuts be trusted with the revolution Settling for Less Michael Cosser, Jacques Du Toit, Mariette Visser, 2004 This study gives statistical and evidential illustration to what influences student choices and behavioral patterns as well as trends in the youth market in South Africa **Multilingual classroom contexts** Prof Christa van der Walt, Dr Verbra Pfeiffer, 2021-12-01 By far the majority of South African students get their schooling in a second language which means that our classrooms are multilingual This state of affairs is not exclusive to our country as can be seen in the many academic conferences on multilingual learning and teaching Terms like translanguaging and biliteracy appear in many articles and books that discuss the role language in education What makes the multilingual nature of our South African classrooms challenging is the fact that many learners switch from one language of learning and teaching to another at various points in their school career from home language to English or Afrikaans after the foundation phase from one language of learning and teaching to another when they move to new schools high school or tertiary institutions This book is an attempt to highlight the transitions from home to school from foundation to intermediate phase from primary to high school and from high school to tertiary institutions *Black Youth Aspirations* Botshabelo Maja, 2021-11-10 This book is about how to trigger the capacity to aspire among black youth Examining the transition out of adulthood and imagined futures of black youth Maja helps us understand how black youth aspirations might be raised and how a better future for young people can be achieved The Youth Dividend Jan H. Hofmeyr, 2012 Numbers & Needs Allyson Lawless, 2005 **The Rise of the Radical Right in the Global South** Rosana Pinheiro-Machado, Tatiana Vargas-Maia, 2023-05-31 The Rise of the Radical Right in the Global South is the first academic study adopting an interdisciplinary and international perspective to offer a comprehensive and groundbreaking framework for understanding the emergence and consolidation of different radical right movements in Global South countries in the twenty first century From deforestation and the anti vaccine movement in Bolsonaro s Brazil to the massacre of religious minorities in Modi s India the rise of the radical right in the Global South is in the news every day Not long ago some of these countries were globally celebrated as emerging economies that consolidated vibrant democracies Nonetheless they never overcame structural problems including economic inequality social violence cultural conservatism and political authoritarianism Featuring case studies from Brazil India the Philippines and South Africa and more generally from Africa and Latin America this book analyses future scenarios and current alternatives to this political movement to the radical right It proposes a shift of focus in examining such a trend adopting a view from the Global South conventional theoretical tools developed around the experience in Global North countries are not enough The authors show that the radical right in the Global South should be analysed through specific lenses considering national historical patterns of political and economic development and instability They also warn that researching these countries may differ from contexts where democratic institutions are more reliable This does not mean abandoning a transnational understanding of the radical right rather it calls

for the opposite the chapters examine how the radical right is invented adapted modified and resisted in specific regions of the globe This volume will be of interest to all those researching the radical right and the politics of development and the Global South *Annual Report* South Africa.
