Unit One: Constitutional Underpinnings

Fundamental Principles of Democracy

- **Direct Democracy** – citizens meet and vote directly on government decisions
- **Representative Democracy (Republic)** – citizens choose officials who make decisions on government policy
- **Magna Carta (1215)** – the first ever attempt to limit the power of the British King, guaranteed all people certain rights
- **Enlightenment Philosophers –Locke and Rousseau**

○ **Social Contract Theory** – principle that people enter into a social contract with the government and allow to be ruled

○ **Consent of the Governed** – principle that there are no supreme rulers, all rulers depend on the approval of the people; when governments fail to protect rights the people have the right to change the government

○ **Natural Rights** – principle that all people are born with certain rights: life, liberty, and property (Jefferson changes property into pursuit of happiness)

- **Declaration of Independence** – Thomas Jefferson's document built on principles of "life, liberty, and the pursuit of happiness" consent of the governed, and social contract theory. It also justified American revolution against England
- **Common Good** – Belief in doing what's best for the nation overall
- **Popular Sovereignty** – Belief that the ultimate authority rests with the people
- **Majority Rule** – Belief that government is run based on the will of the majority

The First Government – **Articles of Confederation**

- Weak association of states (states very independent)
- No central executive power
- No federal power to tax citizens directly
- Federal government could raise an army, (but not pay for it), print money, declare war, and run the post office

The Political Thought of Woodrow Wilson, 1875-1910 Niels Aage Thorsen, 2014-07-14 Niels Thorsen argues that Woodrow Wilson was one of America's most important political scientists Focusing on the period from Wilson's early years until he was elected Governor of New Jersey this work shows why he deserves a prominent place in the history of American political thought even apart from his later attainments in the political arena His book *Congressional Government* his seminal article on *The Study of Public Administration* and his textbook on *The State* were important contributions during the formative years of academic political science in America In contrast to those who propose psychological explanations of Wilson's early interest in political problems Thorsen contends that the crisis of the election of 1876 against the backdrop of the Civil War was decisive in turning Wilson's attention to political ideas Implying the abandonment of a more traditional form of political thought based on the social contract and on constitutionalism egalitarianism and common sense Wilson linked his conclusions about the nature of politics to the rise of the social and economic sciences Distinctive in his academic work were ideas about social and economic diversification as the condition for the growth of national power and about political leadership asserted at home and abroad as a way to overcome traditional American fears about centralized power Originally published in 1988 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **Adult-study Guide** , 1937 Military Review , 1964-07
