Bouck, 2015-12-31 Succinct yet comprehensive Assistive Technology is designed to help educators better understand assistive technology and how it can support students with disabilities from early childhood through the transition into adulthood This practical book is organized around the purpose of technology and the support it can provide rather than a student's disability categorization Grounded in research and filled with engaging case studies and activities author Emily C Bouck offers an unbiased depiction of the advantages and limitations of technology Readers are exposed to a full range of assistive technology including up to date coverage of low and high technology as well as free and for purchase options that can be used to support students with disabilities

Visual Heritage in the Digital Age Eugene Ch'ng, Vincent Gaffney, Henry

Chapman,2013-12-04 Heritage is everywhere and an understanding of our past is increasingly critical to the understanding of our contemporary cultural context and place in global society Visual Heritage in the Digital Age presents the state of the art in the application of digital technologies to heritage studies with the chapters collectively demonstrating the ways in which current developments are liberating the study conservation and management of the past Digital approaches to heritage have developed significantly over recent decades in terms of both the quantity and range of applications However rather than merely improving and enriching the ways in which we understand and engage with the past this technology is enabling us to do this in entirely new ways The chapters contained within this volume present a broad range of technologies for capturing data such as high definition laser scanning survey and geophysical survey modelling including GIS data fusion agent based modelling and engaging with heritage through novel digital interfaces mobile technologies and the use of multi touch interfaces in public spaces The case studies presented include sites landscapes and buildings from across Europe North and Central America and collections relating to the ancient civilisations of the Middle East and North Africa The chronological span is immense extending from the end of the last ice age through to the twentieth century These case studies reveal new ways of approaching heritage using digital tools whether from the perspective of interrogating historical textual data or through the applications of complexity theory and the modelling of agents and behaviours Beyond the data itself Visual Heritage in the Digital Age also presents fresh ways of thinking about digital heritage It explores more theoretical perspectives concerning the role of digital data and the challenges that are presented in terms of its management and preservation
