CleanMem - By PcWinTech.com

Open Site

PcWinTech.com is my other site and CleanMem helps keep memory hungry programs under control like Firefox and Chrome.

CleanMem Works by calling a Windows API. CleanMem doesn't change the working set of a process. It simply asks Windows to do all the work. So Windows does the trimming, the moving and manages everything. This is why there is never any crashes of programs and any performance hit to the system. To put it short CleanMem doesn't work against the Windows memory manager, it works with it :-)
