

WINNERS versus LOSERS

The winner is always part of the answer.	The loser is always part of the problem.
The winner always has a programme.	The loser always has an excuse.
The winner says, "Let me do it for you".	The loser says, "That is not my job".
The winner sees an answer for every problem.	The loser sees a problem for every answer.
The winner says, "It may be difficult but it is possible".	The loser says, "It may be possible but it is difficult".
When a winner makes a mistake, he says, "I am wrong".	When a loser makes a mistake, he says, "It isn't my fault".
A winner makes commitments.	A loser makes promises.
Winners have dreams.	Losers have schemes.
Winners say, "I must do something".	Losers say, "Something must be done".
Winners are a part of the team.	Losers are apart from the team.
Winners see the gain.	Losers see the pain.

An Examination of Winners and Losers Under Medicare's Prospective Payment System, 1991 *An Evaluation of Winners and Losers Under Medicare's Prospective Payment System : Submitted To: Prospective Payment Assessment Commission*, 1992 **Winners and Losers of EU Integration** Helena Tang, 2000-01-01 The contributors include

researchers from the ten CEECs as well as from current EU member countries **BOOK JACKET Of Winners, Losers, and Games** O. B. Rozell, 1976-09 **Why are some Cities Winners or Losers?** Florentin Rack, 2014-12-29 Bachelor Thesis from the year 2014 in the subject Business economics Business Management Corporate Governance grade 1 4 EBS European Business School gGmbH Real Estate Management Institute language English abstract The aim of this bachelor thesis is to find out what drives city growth in Germany It shall find out what are the determinants that make large cities gain or lose inhabitants Especially in Eastern Germany after the reunification there have been some winner cities such as Dresden Leipzig and Potsdam and many loser cities such as Chemnitz Magdeburg and Schwerin In the last decades a similar separation between winners and losers has arisen also in Western Germany So what is the reason for this division into two groups of cities The research is very relevant for city governments and real estate owners or investors Emigration of the working populace and few births lower the tax earnings and raise the necessary public expenses a city has to bear while the opposite makes a city thrive fiscally financially and economically Rents and land prices depend on the development of the city size shrinking cities have horrendous vacancy rates while prices are exploding in growing cities Knowing what the reasons for city growth shrinkage are enables city governors to adapt the right policies to make their city become an exception of the overall demographic collapse in Germany or to turn around a dangerous progress Knowing these reasons also enables real estate investors to predict future demand for residential office and retail space and to decide whether properties are under or overpriced **Sport Marketing** George R. Milne, Mark A. McDonald, 1999 This edition presents cutting edge conceptual and empirical approaches for managers to conduct relationships with consumers Winner-Loser Reversals in National Stock Market Indices Mr. Anthony J. Richards, 1997-12-01 This paper examines possible explanations for winner loser reversals in the national stock market indices of 16 countries There is no evidence that loser countries are riskier than winner countries either in terms of standard deviations covariance with the world market or other risk factors or performance in adverse economic states of the world While there is evidence that small markets are subject to larger reversals than large markets perhaps because of some form of market imperfection the reversals are not just a small market phenomenon The apparent anomaly of winner loser reversals in national market indices therefore remains unresolved Losers' Consent Christopher J. Anderson, André Blais, Shaun Bowler, Todd Donovan, Ola Listhaug, 2005-01-13 Democratic elections are designed to create unequal outcomes for some to win others have to lose This book examines the consequences of this inequality for the legitimacy of democratic political institutions and systems Using survey data collected in

democracies around the globe the authors argue that losing generates ambivalent attitudes towards political authorities Because the efficacy and ultimately the survival of democratic regimes can be seriously threatened if the losers do not consent to their loss the central themes of this book focus on losing how losers respond to their loss and how institutions shape losing While there tends to be a gap in support for the political system between winners and losers it is not ubiquitous The book paints a picture of losers consent that portrays losers as political actors whose experience and whose incentives to accept defeat are shaped both by who they are as individuals as well as the political environment in which loss is given meaning Given that the winner loser gap in legitimacy is a persistent feature of democratic politics the findings presented in this book contain crucial implications for our understanding of the functioning and stability of democracies Comparative Politics is a series for students and teachers of political science that deals with contemporary government and politics The General Editors are Professor Alfio Mastropaolo University of Turin and Kenneth Newton University of Southampton and Wissenschaftszentrum Berlin The series is published in association with the European Consortium for Political Research

Elections and Democracy Jacques Thomassen, 2014-07-03 Elections and Democracy addresses the contrast between two different views on representative democracy According to the first view elections are a mechanism to hold government accountable In the second view elections are primarily a means to ensure that citizens views and interests are properly represented in the democratic process The majoritarian and consensus models of democracy are the embodiment in institutional structures of these two different views of democracy In the majoritarian view the single most important function of an election is the selection of a government The concentration of power in the hands of an elected majority government makes it accountable to the people In consensus models of democracy or proportional systems the major function of elections is to elect the members of parliament who together should be as representative as possible of the electorate as a whole The criterion for the democratic quality of the system is how representative parliament really is The book explores how far these different views and their embodiment in institutional structures influence vote choice political participation and satisfaction with the functioning of democracy The volume is based on data from the Comparative Study of Electoral Systems CSES a comparative study across 36 countries The general conclusion of the book is that formal political institutions are less relevant for people's attitudes and behavior than often presumed Rather than formal political institutions like the electoral system it seems to be characteristics of the party system like polarization and the clarity of responsibility that really matter The Comparative Study of Electoral Systems CSES is a collaborative program of research among election study teams from around the world Participating countries include a common module of survey questions in their post election studies The resulting data are deposited along with voting demographic district and macro variables The studies are then merged into a single free public dataset for use in comparative study and cross level analysis The set of volumes in this series is based on these CSES modules and the volumes address the key theoretical issues and empirical debates in the study of elections and

representative democracy Some of the volumes will be organized around the theoretical issues raised by a particular module while others will be thematic in their focus Taken together these volumes will provide a rigorous and ongoing contribution to understanding the expansion and consolidation of democracy in the twenty first century Series editors Hans Dieter Klingemann and Ian McAllister

Advancing Electoral Integrity Pippa Norris, Richard W. Frank, Ferran Martínez i Coma, 2014 This volume collects essays from international experts who evaluate the robustness conceptual validity and reliability of the growing body of evidence of voter fraud and electoral misconduct around the world in developed and developing democracies The essays compare alternative approaches and apply these methods to evaluate the quality of elections in several areas including in the United States Sub Saharan Africa and Latin America

How Europeans View and Evaluate Democracy Revisited Mónica Ferrín, Hanspeter Kriesi, 2025-02-06 In 2012 How Europeans View and Evaluate Democracy assessed the Europeans views and evaluations of the state of democracy after one of the deepest economic and financial crises worldwide Against the most pessimistic Zeitgeist the book found that there was overwhelming support for democracy in Europe even if the breadth and scope of the citizens demands for their democratic systems varied within and between countries Importantly with very few exceptions the implementation of the basic democratic principle of free and fair elections was well evaluated across Europe However analysis also showed that there was room for improvement in many countries according to the citizens evaluations Overall in 2012 there were no symptoms of a democratic crisis in Europe Ten years and several crises later the authors reassess how Europeans view and evaluate democracy and that many changes that have occurred in the meantime This book How Europeans View and Evaluate Democracy Revisited compares how Europeans view and evaluate democracy in 2021 22 and in 2012 based on surveys in 24 European countries It shows that Europeans continue to be attached to democratic ideals and that they continue to be rather dissatisfied with the way these ideals are implemented in their country The liberal democratic model continues to enjoy great support just as it did a decade ago and there is also support for additional models of democracy for social direct and populist democracy Surprisingly the populist model turns out to be a complement rather than a substitute for the other models

Comparative Politics is a series for researchers teachers and students of political science that deals with contemporary government and politics Global in scope books in the series are characterized by a stress on comparative analysis and strong methodological rigour The series is published in association with the European Consortium for Political Research For more information visit www.ecprnet.eu The series is edited by Nicole Bolleyer Chair of Comparative Political Science Geschwister Scholl Institut LMU Munich and Jonathan Slapin Professor of Political Institutions and European Politics Department of Political Science University of Zurich

Animal Contests Ian C. W. Hardy, Mark Briffa, 2013-05-30 Contests are an important aspect of the lives of diverse animals from sea anemones competing for space on a rocky shore to fallow deer stags contending for access to females Why do animals fight What determines when fights stop and which contestant wins Addressing fundamental

questions on contest behaviour this volume presents theoretical and empirical perspectives across a range of species The historical development of contest research the evolutionary theory of both dyadic and multiparty contests and approaches to experimental design and data analysis are discussed in the first chapters This is followed by reviews of research in key animal taxa from the use of aerial displays and assessment rules in butterflies and the developmental biology of weapons in beetles through to interstate warfare in humans The final chapter considers future directions and applications of contest research making this a comprehensive resource for both graduate students and researchers in the field

Capital Markets and Investment Decision Making Raj S. Dhankar, 2019-04-25 This book discusses capital markets and investment decision making focusing on the globalisation of the world economy It presents empirically tested results from Indian and Southwest Asian stock markets and offers valuable insights into the working of Indian capital markets The book is divided into four parts the first part examines capital market operations particularly clearance and settlement processes and stock market operations The second part then addresses the functioning of global markets and investment decisions more specifically it explores calendar anomalies dependencies overreaction effect causality effect and stock returns volatility in South Asia U S and global stock markets as a whole Part three covers issues relating to capital structure values of firm and investment strategies Lastly part four discusses emerging issues in finance like behavioral finance Islamic finance and international financial reporting standards The book fills the gap in the existing finance literature and helps fund managers and individual investors make more accurate investment decisions

Finance and Competitiveness in Developing Countries José María Fanelli, Rohinton Medhora, 2002 Using detailed trade and firm level financial data the authors demonstrate for example that while links between finance and competitiveness are strong they are not uniform across sectors and countries This book examines the link between finance and competitiveness at the macro and sectoral levels in seven different countries Argentina Brazil India Indonesia the Philippines South Africa and Tunisia and investigates key international issues such as the evidence of the impact of exchange rate variability on trade patterns in bank lending and trade openness and development

Why Policy Representation Matters Luigi Curini, Willy Jou, Vincenzo Memoli, 2015-06-12 Elections are a fundamental element of democracy since elected governments reflect voter preferences At the same time it is inevitable that policies pursued by any government closely resemble the preferences of some citizens while alienating others who hold different views Previous works have examined how institutional settings facilitate or hinder policy proximity between citizens and governments Building on their findings the book explores a series of so what questions how and to what extent does the distance between individual and government positions affect citizens propensity to vote protest believe in democracy and even feel satisfied with their lives Using cross national public opinion data this book is an original scholarly research which develops theoretically grounded hypotheses to test the effect of citizen government proximity on three dependent variables After introducing the data both public opinion surveys and country level statistics and the methodology to be used in

subsequent chapters one chapter each is devoted to how proximity or the absence thereof affects political participation satisfaction with democracy and happiness Differences in political attitudes and behavior between electoral winners and losers and ideological moderates and radicals are also discussed in depth *Mapping Value Orientations in Central and Eastern Europe* ,2010-11-11 Since the dramatic events in 1989 and 1990 Central and Eastern Europeans have been engaged in a process of democratization and liberalization which are transforming their societies fundamentally The rapid transformation processes appear to be very differential and the particular patterns are complex to interpret and understand This volume elaborates on a number of issues that seem particularly important for the people in Central and Eastern Europe the development and working of democracy the public support for legitimacy and efficacy of democracy and the free market economy and of course the stability of the newly established political culture **Irrational Exuberance Reconsidered**

Mathias Külpmann,2013-03-20 Does the stock market overreact Recent capital market turbulences have cast doubt whether the behaviour of stock markets is in line with rational investor behaviour To which extent stock returns are predictable is the question at the heart of the controversy between the paradigms of rational asset pricing and behavioural finance This new and revised edition discusses the empirical evidence from both perspectives Theory and empirical analysis are blended with feedback from security analysts to offer a road towards a deeper understanding of the underlying forces to drive performance in the stock market In his book *Irrational Exuberance* Robert Shiller offered an analysis of the US stock market in 2000 The focus of his book was the level of the stock market which he thought to be overvalued at the time This monograph offers a complementary analysis of the cross section of stock returns **Investment Philosophies** Aswath

Damodaran,2003-01-20 Table of contents **The Power of Opposition** Simone Wegmann,2022-07-01 Proposing a novel way to look at the consolidation of democratic regimes this book presents important theoretical and empirical contributions to the study of democratic consolidation legislative organization and public opinion Theoretically Simone Wegmann brings legislatures into focus as the main body representing both winners and losers of democratic elections Empirically Wegmann shows that the degree of policy making power of opposition players varies considerably between countries Using survey data from the CSES the ESS and the LAPOP and systematically analyzing more than 50 legislatures across the world and the specific rights they grant to opposition players during the policy making process Wegmann demonstrates that neglecting the curial role of the legislature in a democratic setting can only lead to an incomplete assessment of the importance of institutions for democratic consolidation *The Power of Opposition* will be of great interest to scholars of comparative politics especially those working on questions related to legislative organization democratic consolidation and or public opinion

The Oxford Handbook of Dutch Politics ,2024-10-06 The Oxford Handbook of Dutch Politics provides a comprehensive longitudinal overview of the state of the art of academic research on the Dutch political system its origins and historical development its key institutions main fault lines pivotal processes and key public policy dynamics In each of the chapters

researchers take stock of what if anything has changed over time how scholars have conceptualized and studied these dynamics and what key factors can account for the developmental patterns found to be at play Notwithstanding its considerable degree of constitutional and institutional stability Dutch politics has seen considerable step changes and occasional upheavals across the last half century Influenced by long term demographic socio economic and cultural shifts the old social cleavages have waned New social identities and dividing lines such as ethnicity education place and gender have influenced Dutch citizens political attitudes and behaviours including their voting patterns The media landscape and the information environment have been altered by new technologies that politicians and citizens alike have to navigate This has produced changes in such pivotal components as the party system coalition formation and management process and executive legislative relations and many others Moreover public policy paradigms and the political coalitions that sustained them have ascended and lost traction in most of the eleven policy domains discussed in the Handbook In all this volume provides unique and indispensable insights into stability and change in a political system that once gained notoriety as an archetype of a consensual or consociational democracy
