China's Incomplete Military Transformation Michael S. Chase,Jeffrey Engstrom,Tai Ming Cheung,Kristen A. Gunness,Scott Harold,Susan Puska,Samuel K. Berkowitz,2015-02-13 This report examines many of the weaknesses in China s People s Liberation Army PLA human capital and organization realms its combat capabilities across various domains and China s defense research and industrial complex Furthermore the report analyzes how these weaknesses affect the PLA s performance of missions tasked by Beijing China s military isn t ready to win wars despite spending heavily to modernize The

People's Liberation Army suffers from potentially serious weaknesses that could limit its ability to conduct the operations required to fight and win future conflicts. Although the PLA's capabilities have increased dramatically, its remaining weaknesses increase the risk of failure to successfully perform the missions the Chinese Communist Party leaders may task it to perform, the report says. It cited Taiwan contingencies, maritime claim missions, protecting sea lines of communications, and some non-war military operations. The report looks at two critical shortcomings: institutional and combat capabilities. On institutional issues, the PLA faces shortcomings regarding outdated command structures, quality of personnel, professionalism, and corruption. Combat weaknesses include logistical, insufficient strategic airlift capabilities, limited numbers of special mission aircraft, and deficiencies in fleet air defense and anti-submarine warfare.

Gudrun Maria Lydholm, 2017-03-13 The idea of a state religion is seldom connected to religious freedom and liberal modern and democratic states However such a situation existed in Norway until 2012 when the Lutheran Church was the state church of Norway A large majority of the population belonged to the church even though the percentage in 2013 had fallen to well over seventy five The relationship between the church and minority religious movements demanded adaptation and compromises from the minority churches The Salvation Army's enculturation and accommodation during its 128 year history in Norway illustrates such a situation The book examines how The Salvation Army accommodated itself both doctrinally as well as practically to the situation of a dominant state church The study reveals such a close affiliation of Salvationists to the Norwegian Church as a state institution that it raises the question of whether a concept of civil religion was implicitly present in Salvationists view of the state church and their own adherence to the church This situation also raises the question of what constitutes a real church The book indicates the tension between Lutheran and Salvationist ecclesiology as well as the influence from the Lutheran Church **Problem-Solving** Howard Eisner, 2021-06-14 Problem solving and better thinking skills are among the top skills that employers are looking for This book presents various methods of problem solving that can be adapted to any field It focuses on a set of a dozen new approaches with an ending result to finding better solutions to problems that you may have previously found difficult The book discusses problem solving based upon new thinking skills and presents the relationship between problem solving and creativity A connection between problem solving and re engineering is presented as the book explores the ability to tackle new and difficult problems in all aspects of life It points you in the direction of how to easily find better solutions to problems that previously were found to be difficult Target audience is general engineers systems engineers scientists technologists mathematicians and lawyers
