Figure 1 shows the results of the regression analysis. The overall R^2 is 0.12 and the adjusted R^2 is 0.09. The results indicate that the model is statistically significant ($F = 1.74$, $p = 0.000$). The results also indicate that the model is statistically significant ($F = 1.74$, $p = 0.000$). The results also indicate that the model is statistically significant ($F = 1.74$, $p = 0.000$).

Understanding Human Cognition Don Harris,2013-07-03 This two volume set LNAI 8019 and LNAI 8020 constitutes the refereed proceedings of the 10th International Conference on Engineering Psychology and Cognitive Ergonomics EPCE 2013 held as part of the 15th International Conference on Human Computer Interaction HCII 2013 held in Las Vegas USA in July 2013 jointly with 12 other thematically similar conferences The total of 1666 papers and 303 posters presented at the HCII 2013 conferences was carefully reviewed and selected from 5210 submissions These papers address the latest research and development efforts and highlight the human aspects of

design and use of computing systems The papers accepted for presentation thoroughly cover the entire field of human computer interaction addressing major advances in knowledge and effective use of computers in a variety of application areas The total of 81 contributions included in the EPCE proceedings were carefully reviewed and selected for inclusion in this two volume set The papers included in this volume are organized in the following topical sections cognitive issues in HCI measuring and monitoring cognition cognitive issues in complex environments productivity creativity learning and collaboration

Seating and Wheeled Mobility Michelle L. Lange, Jean L. Minkel, 2024-06-01 Seating and Wheeled Mobility A Clinical Resource Guide presents clinical assessment considerations when working with a person with a disability who may need wheelchair seating for postural support skin integrity or a wheelchair base to best meet dependent or independent mobility needs Michelle L Lange and Jean Minkel have designed this text to support occupational and physical therapists complex rehabilitation technology suppliers and even third party payers who are interested in wheelchair seating and mobility assessment and applications Seating and Wheeled Mobility provides a wide spectrum of information from foundational information for those practitioners who are new to the field to in depth population specific information for practitioners who perhaps have not worked with a particular population in the past Information sharing opportunities for demonstration and trial and patience on the part of the clinician working with the person with a disability are all critical precursors to the actual process of making equipment recommendations Seating and Wheeled Mobility is divided into sections each addressing a different area of clinical practice The first section is an in depth presentation of the assessment process and the critical understanding of pressure management needed by the clinical team when working with a client population who rely on wheeled mobility The second section focuses on postural support Also included is a completely updated method to measure and describe the seated person and related support surfaces needed when recommending a device The third section lays the foundation for clinical decision making around the assessment for and application of the most appropriate wheeled mobility device The fourth section provides in depth clinical applications for each category of mobility devices Also addressed is proper documentation to assist in the funding of these devices The fifth section provides population specific information regarding the clinical application of position pressure management and functional mobility as it applies to the pediatric geriatric and bariatric populations as well as persons with both degenerative and complex neuromuscular impairments The last section presents additional considerations when working with persons who are aging with a disability environmental assessments transportation and the application of standards Seating and Wheeled Mobility A Clinical Resource Guide provides the depth and breadth of the clinical practice of wheelchair seating and mobility to both those who are new to the field as well as seasoned professionals

Mobile Computing Tomasz Imielinski, Henry F. Korth, 2007-08-26 The rapid development of wireless digital communication technology has created capabilities that software systems are only beginning to exploit The falling cost of both communication and of mobile

computing devices laptop computers hand held computers etc is making wireless computing affordable not only to business users but also to consumers Mobile computing is not a scaled down version of the established and we studied field of distributed computing The nature of wireless communication media and the mobility of computers combine to create fundamentally new problems in networking operating systems and information systems Further more many of the applications envisioned for mobile computing place novel demands on software systems Although mobile computing is still in its infancy some basic concepts have been identified and several seminal experimental systems developed This book includes a set of contributed papers that describe these concepts and systems Other papers describe applications that are currently being deployed and tested The first chapter offers an introduction to the field of mobile computing a survey of technical issues and a summary of the papers that comprise subsequent chapters We have chosen to reprint several key papers that appeared previously in conference proceedings Many of the papers in this book are being published here for the first time Of these new papers some are expanded versions of papers first presented at the NSF sponsored Mobidata Workshop on Mobile and Wireless Information Systems held at Rutgers University on Oct 31 and Nov 1 1994
