Netherlands Yearbook of International Law 2015 Maarten den Heijer, Harmen van der Wilt, 2016-08-04 Jus cogens is a formidable yet elusive concept of international law. Since its incorporation in the Vienna Convention on the Law of Treaties some 35 years ago it has made tentative inroads into international legal practice. But its role in international law is arguably less prominent than might have been expected on the basis of its powerful potential and in view of wider developments in international law that call for constitutionalisation and hierarchy including the processes of fragmentation and humanization. This volume of the Netherlands Yearbook of International Law sets out to clarify the concepts and doctrines relevant to jus cogens and to sharpen the debate on its theoretical foundations functions and legal effects. To that purpose the volume brings together contributions on the genesis and function of jus cogens on the application of jus cogens in specialised areas of international law and on its enforcement and legal consequences. Together they reinforce the understanding of jus cogens as a hierarchical concept of international law and shed light on its potential for further development.

The Future of Cross-Border Insolvency Irit Mevorach,2018-03-01 A fresh and insightful guide to post financial crisis cross border insolvency this book interrogates the current regime and sets out a framework for improving its future In recent decades and especially since the global financial crisis a number of important initiatives have focused on developing the mechanisms for managing the insolvency of multinational enterprises and financial institutions The book considers the effectiveness of the current system and identifies the gaps that could be bridged by adopting certain strategies and tools to improve the system further

The book first discusses the theoretical debate regarding cross border insolvency and surveys the strengths and weaknesses of the prevailing method modified universalism in its application to both commercial entities and financial institutions consequently identifying a single set of emerging norms The book argues that adhering to these norms more robustly would enhance global welfare and produce the best outcomes for businesses and institutions By drawing upon sources from international law as well as behavioural and economic theory the book offers a blueprint for meeting the demands of future cross border insolvencies It considers how to translate modified universalism into binding international law and how to choose the right instrument for cross border insolvency as well as the impact that instrument design has on decisions and choices It explores how to encourage compliance and proposes mechanisms that could potentially overcome or at least take into account behavioural biases in decision making International organisations, non-State actors, and the formation of customary international law Sufyan Droubi, Jean d'Aspremont, 2020-12-08 This volume offers new practical and theoretical perspectives on one of the most complex questions regarding the formation of international law namely that actors other than states contribute to the making of customary international law Notwithstanding the International Law Commission's valuable contribution the making of customary international law remains riddled with acute practical and theoretical controversies that continue to be intensively debated Making extensive reference to the case law of international law courts and tribunals as well as the most recent scholarly work on customary international law this volume provides a comprehensive study of the contribution of international organisations and non state actors to the formation of customary international law With innovative tools and guidance for law students legal scholars and researchers in law as well as legal practitioners advisers judges arbitrators and counsels this collection is essential reading for those wishing to understand and address contemporary questions of international law making **The IMLI Treatise On Global Ocean Governance** David Joseph Attard, Malgosia Fitzmaurice, Alexandros Ntovas, 2018-07-11 The 1982 United Nations Convention on the Law of the Sea UNCLOS remains the cornerstone of global ocean governance However it lacks effective provisions or mechanisms to ensure that all ocean space and related problems are dealt with holistically With seemingly no opportunity for revision due to the Convention's burdensome amendment provisions complementary mechanisms dealing with such aspects of global ocean governance including maritime transport fisheries and marine environmental sustainability have been developed under the aegis of the United Nations and other relevant international organizations This approach is inherently fragmented and unable to achieve sustainable global ocean governance In light of the Sustainable Development Goals SDGs particularly Goal 14 the IMLI Treatise proposes a new paradigm on the basis of integrated and cross sectoral approach in order to realise a more effective and sustainable governance regime for the oceans This volume focuses on the role of the UN Specialized Agencies towards the development of effective and sustainable ocean governance by looking at the more elaborate mechanisms they developed in order to achieve the desired objectives laid down in UNCLOS From FAO to UNODC the volume examines how

they ensure sustainable development and how much coordination exists among them
