Biorefinery: A Sustainable Approach for the Production of Biomaterials, Biochemicals and Biofuels Pranav D. Pathak, Sachin A. Mandavgane, 2023-03-01 This book discusses recent trends and concepts in the field of biorefinery. It discusses optimal and economic strategies for converting biomass to value added products to maximize profits with minimal environmental impact with a sustainability approach. The chapters of the book are focused on the current technologies, technological aspects, life cycle assessment and case studies. The book is divided into three sections: the first section presents strategies for the production of biofuels like bioethanol, biomethane, biohydrogen, bio oil, gasification etc from the biomass in a sustainable way. The second section reviews the extraction of bioactive chemicals, phenolic antioxidants, enzymes and carboxylic acid from the biomass residue. The last section examines the utilization of biomass for the production of bioactive materials including biofertilizers, bioadsorbents, activated carbon, nano materials and pigments. This book explores the relation between biofuels and the sustainable development goals (SDGs). 7 *Advances in Engineering Materials, Structures and Systems: Innovations, Mechanics and Applications* Alphose Zingoni, 2019-08-21 *Advances in Engineering Materials, Structures and Systems: Innovations, Mechanics and Applications* comprises 411 papers that were presented at SEMC 2019, the Seventh International Conference on Structural Engineering, Mechanics and Computation held in Cape Town, South Africa from 2 to 4 September 2019. The subject matter reflects the broad scope of SEMC conferences and covers a wide variety of engineering materials, both traditional and innovative, and many types of structures. The many topics featured in these Proceedings can be classified into six broad categories that deal with: i) the mechanics of materials and fluids (elasticity, plasticity, flow through porous media, fluid dynamics, fracture, fatigue, damage, delamination, corrosion, bond, creep, shrinkage etc); ii) the mechanics of structures and systems (structural dynamics, vibration, seismic response, soil-structure interaction, fluid-structure interaction, response to blast and impact, response to fire, structural stability, buckling, collapse, behaviour); iii) the numerical modelling and experimental testing of materials and structures (numerical methods, simulation techniques, multi-scale modelling, computational modelling, laboratory testing, field testing, experimental measurements); iv) innovations and special structures (nanostructures, adaptive structures, smart structures, composite structures, bio-inspired structures, shell structures, membranes, space structures, lightweight structures, long span structures, tall buildings, wind turbines etc); v) design in traditional engineering materials (steel, concrete, steel-concrete composite, aluminium, masonry, timber, glass); vi) the process of structural engineering (conceptualisation, planning, analysis, design, optimization, construction, assembly, manufacture, testing, maintenance, monitoring, assessment, repair, strengthening, retrofitting, decommissioning). The SEMC 2019 Proceedings will be of interest to civil, structural, mechanical, marine and aerospace engineers, researchers, developers, practitioners and academics in these disciplines. They will find them useful. Two versions of the papers are available: short versions intended to be concise but self-contained summaries of the full papers are in this printed book. The full versions of the papers are in the e

book **Handbook of Research on Socio-Economic Impacts of Religious Tourism and Pilgrimage** Álvarez-García, José, del Río Rama, María de la Cruz, Gómez-Ullate, Martín, 2018-08-31 Religious studies and research have gained a lot of interest and attention from researchers policy makers and practitioners over the last few years but the socio economic impacts have not been explored Taking into account the profound economic impact the tourism and hospitality industries can have on regions and cities around the world further research in this area is critical to analyze the extent of such impact and the ramifications that are associated with it The Handbook of Research on Socio Economic Impacts of Religious Tourism and Pilgrimage is a pivotal reference source that provides vital research on the social and economic factors in faith based journeys While highlighting topics such as tourist spending spiritual tourism and local development this publication explores religious tourism in the middle age as well as the methods of modern religious tourism This book is ideally designed for business managers cultural preservationists academicians business professionals entrepreneurs and upper level students seeking current research on religious tourism and its socio economic impacts *Handbook of Research on Using Global Collective Intelligence and Creativity to Solve Wicked Problems* Fields, Ziska, 2020-11-27 Today s world is continually facing complex and life threatening issues that are too difficult or even impossible to solve These challenges have been titled wicked problems due to their radical and multifarious nature Recently there has been a focus on global cooperation and gathering creative and diverse methods from around the world to solve these issues Accumulating research and information on these collective intelligence methods is vital in comprehending current international issues and what possible solutions are being developed through the use of global collaboration The Handbook of Research on Using Global Collective Intelligence and Creativity to Solve Wicked Problems is a pivotal reference source that provides vital research on the collaboration between global communities in developing creative solutions for radical worldwide issues While highlighting topics such as collaboration technologies neuro leadership and sustainable global solutions this publication explores diverse collections of problem solving methods and applying them on a global scale This book is ideally designed for scholars researchers students policymakers strategists economists and educators seeking current research on problem solving methods using collective intelligence and creativity *Fundamentals of Port Engineering* Koos Schoonees, 2023-12-21 Port engineering primarily deals with the design construction operation management and maintenance of ports overlapping with many other disciplines This book provides an introductory text to prospective graduate port engineers and presents a wide variety of port subjects for practicing engineers It covers almost all topics related to port engineering in a fundamental way including dredging marine aids to navigation environmental issues containers liquid bulk dry bulk general cargo multipurpose roll on roll off Ro Ro fishing and ferry terminals Discussions are targeted at a conceptual design level Other features Aspects of port engineering are discussed including shipping maritime trade environmental aspects such as climate change resilience of ports nature based solutions and port management such as security equipment slurry pumping and so forth Illustrates the

design of port terminals Discusses site selection for a new port the factors to be considered and ways to compare different potential port sites Explores asset management and repair of marine structures Includes case studies from around the world examples and practical and user friendly guidelines

The walk without limbs: Searching for indigenous health knowledge in a rural context in South Africa Gubela Mji,Melanie Alperstein,Nondwe Bongokazi Mlenzana,Karen Galloway,Chioma Ohajunwa,Lieketseng Ned,Ntombekhaya Tshabalala,2019-12-12 In a country as diverse as South Africa sickness and health often mean different things to different people so much so that the different health definitions and health belief models in the country seem to have a profound influence on the health seeking behaviour of the people who are part of our vibrant multicultural society This book is concerned with the integration of indigenous health knowledge IHK into the current Western orientated Primary Health Care PHC model The first section of the book highlights the challenges facing the training of health professionals using a curriculum that is not drawing its knowledge base from the indigenous context and the people of that context Such professionals will later recognise that they are walking without limbs in matters pertaining to health The area that was chosen for conducting the research was KwaBomvana in Xhosa Elliotdale Eastern Cape province South Africa The people who reside there are called AmaBomvana The area where the Bomvana peoples reside is served by Madwaleni Hospital and eight surrounding clinics Qualitative ethnographic feminist methods of data collection supported the research done for Section 1 of the book Section 2 comprises the translation and implementation of PhD study outcomes and had contributions from various researchers In the critical research findings of the PhD study older Xhosa women identify the inclusion of social determinants of health as vital to the health problems they managed within their homes For them each disease is linked to a social determinant of health and the management of health problems includes the management of social determinants of health For them it is about the health of the home and not just about the management of disease They believe that healthy homes make healthy villages and that the prevention of the development of disease is related to the strengthening of the home Health and illness should be seen within both physical and spiritual contexts without health there can be no progress in the home When defining health the older Xhosa women add three critical components to the WHO health definition namely food security healthy children and families and peace and security in their villages Prof Mji further proposes that these three elements should be included in the next revision of the WHO health definition because they are not only important for the Bomvana people where the research was conducted but also for the rest of humanity In light of the promise of National Health Insurance and the revitalisation of PHC this book proposes that these two major national health policies should take cognisance of the IHK utilised by the older Xhosa women In addition to what this research implies these policies should also take note of all IHK from the indigenous peoples of South Africa Africa and the rest of the world and that there should be a clear plan as to how the knowledge can be supported within a health care systems approach

The Education Triple Cocktail Brahm Fleisch,2018-08-15 The Education Triple Cocktail brings together rigorous quantitative

and qualitative research on a new approach to improving foundational teaching and learning for schoolchildren living in working class poor and remote rural communities in resource constrained systems like South Africa At the core of this book is the theory and evidence for a powerful new interlocking and mutually reinforcing change model Inspired by the AIDS treatment story the three pronged approach of structured daily lesson plans appropriate and high quality educational materials and one on one instructional coaching to help teachers transform their instructional practices in early grade classrooms shows that it will improve learning outcomes For education systems defined by low levels of early grade learning and profoundly unequal outcomes The Education Triple Cocktail offers a theoretically informed evidence based way forward This book will be of immense use to teachers students of Education policymakers and parents

Charophytes:

Evolutionary Ancestors of Plants and Emerging Models for Plant Research David S. Domozych,Zoë A. Popper,Iben Sørensen,2017-05-11 The charophytes are the group of green algae that are ancestral and most closely related to land plants Today these organisms are not only important in evolutionary studies but have become outstanding model organisms for plant research

Materials for Advanced Heat Transfer Systems S. J. Vijay,Brusly Solomon,Josua Meyer,2022-11-26 Materials for Advanced Heat Transfer Systems presents the latest research and technologies developed for high performance materials in heat transfer and cooling The book compiles sought after research academics and industry experts need to adopt to solve common problems in critical areas of heat transfer and cooling to help advance the field further A variety of methodologies are included to synthesize the material used along with the correct procedures to follow to ensure appropriate and effective use Various case studies are presented to help the reader further understand the benefits and challenges of the materials discussed Researchers academics students and engineers working on heat transfer systems will benefit from this interdisciplinary and applications focused reference and be guided through various methodologies to make informed decisions based on the latest research and technologies available Presents current and futuristic materials that are being synthesized or used for improving heat transfer mechanisms of a system Applies the technologies models and methods to a variety of applications including power generation aerospace electronics and automobiles Includes recent case studies which exemplify the concepts and technologies analyzed

Engineering the Plant Factory for the Production of Biologics and Small-Molecule Medicines Domenico De Martinis,Rosella Franconi,Eugenio Benvenuto,Edward P. Rybicki,Kazuhito Fujiyama,2017-04-27 Plant gene transfer achieved in the early 80s paved the way for the exploitation of the potential of gene engineering to add novel agronomic traits and or to design plants as factories for high added value molecules For this latter area of research the term Molecular Farming was coined in reference to agricultural applications in that major crops like maize and tobacco were originally used basically for pharma applications The concept of the green biofactory implies different advantages over the typical cell factories based on animal cell or microbial cultures already when considering the investment and managing costs of fermenters Although yield stability and quality of the molecules may vary among different

heterologous systems and plants are competitive on a case to case basis still the plant factory attracts scientists and technologists for the challenging features of low production cost product safety and easy scale up Once engineered a plant is among the cheapest and easiest eukaryotic system to be bred with simple know how using nutrients water and light Molecules that are currently being produced in plants vary from industrial and pharmaceutical proteins including medical diagnostics proteins and vaccine antigens to nutritional supplements such as vitamins carbohydrates and biopolymers Convergence among disciplines as distant as plant physiology and pharmacology and more recently as omic sciences bioinformatics and nanotechnology increases the options of research on the plant cell factory Farming for Pharming biologics and small molecule medicines is a challenging area of plant biotechnology that may break the limits of current standard production technologies The recent success on Ebola fighting with plant made antibodies put a spotlight on the enormous potential of next generation herbal medicines made especially in the name of the guiding principle of reduction of costs hence reduction of disparities of health rights and as a tool to guarantee adequate health protection in developing countries

is all about *Biosensors in Food Safety and Quality* Poonam Mishra, Partha Pratim Sahu, 2022-04-25 Biosensors in food safety and quality have become indispensable in today's world due to the requirement of food safety and security for human health and nutrition. This book covers various types of sensors and biosensors that can be used for food safety and food quality monitoring but these are not limited to conventional sensors such as temperature sensors, optical sensors, electrochemical sensors, calorimetric sensors and pH sensors. The chapters are framed in a way that readers can experience the novel fabrication procedures of some advanced sensors including lab on a chip biosensors, IoT based sensors, microcontroller based sensors and so on, particularly for fruits and vegetables, fermented products, plantation products, dairy based products, heavy metal analysis in water, meat, fish etc. Its simplistic presentation and pedagogical writing provide the necessary thrust and adequate information for beginners, scientists and researchers. The book offers comprehensive coverage of the most essential topics which include the following: Fundamentals of biosensors, Overview of food safety and quality analysis, Major toxicants of food and water, Fabrication techniques of biosensors applicable for different segments of the food industry. This book serves as a reference for scientific investigators who work on the assurance of food safety and security using biosensing principles as well as researchers developing biosensors for food analysis. It may also be used as a textbook for graduate level courses in bioelectronics.

Corporate Social Responsibility - Sustainable Business Rae Lindsay, Roger Martella, 2020-06-17 In a dramatic departure from its voluntary origins, corporate social responsibility (CSR) is rapidly shifting to hold multinational companies accountable for more than traditional shareholder performance. This CSR movement is embracing new environmental, social and governance (ESG) frameworks that both promote global sustainability goals and enhance accountability for negative impacts businesses can have on planet and people. This collection of essays by leading businesspeople, international civil servants, legal practitioners, academics and other experts offers a forward looking and pragmatic perspective that illuminates the major themes in this movement towards increasingly sustainable, transparent and accountable business practices. The collection shows how CSR has evolved to account for societal pressures, environmental, climate change and human rights impacts, international policy imperatives and the practical challenges of regulating commercial activity that transcends borders. The chapters offer an in depth examination of current issues including international frameworks and multistakeholder initiatives catalysing foundational change, the shifting emphasis on corporate imperatives to avoid harm to third parties, trends in CSR focused on assuring the planet's future sustainability and social stability, regulatory initiatives around the globe including Europe, North America, Asia and Africa and extended accountability for activities of corporate group members and supply chains. The pressure and business case for companies to incorporate CSR into corporate governance is intensifying with each quarter shareholder meeting and regulatory agenda. The integration of CSR and new ESG frameworks into multinational corporate strategy and operations is key to sustainable business models that can generate long term value for the organization and all stakeholders. Their acceptance as

cornerstones of 21st century business practice appears inevitable Taking full account of the imperative for companies and their lawyers to grapple with the practical and legal challenges in this area this volume is an invaluable and pragmatic addition to the practitioners toolbox at this important juncture in an ever more dynamic field
