economics gender studies and global studies **Poverty and Power** Edward Royce, 2015-01-21 Poverty and Power asserts that American poverty is a structural problem resulting from failings in our social system rather than individual failings of the poor The second edition has been revised throughout with new statistical information analysis of the recent recession the Obama presidency increasing political polarization and more **The End of American Labor Unions** Raymond L. Hogler, 2015-03-30 By examining the history of the legal regulation of union actions this fascinating book offers a new interpretation of American labor law policy and its harmful impact on workers today Arguing that the decline in union membership and bargaining power is linked to rising income inequality this important book traces the evolution of labor law in America from the first labor law case in 1806 through the passage of right to work legislation in Michigan and Indiana in 2012 In doing so it shares important insights into economic development exploring both the nature of work in America and the part the legal system played and continues to play in shaping the lives of American workers The book illustrates the intertwined history of labor law and politics showing how these forces quashed unions in the 19th century allowed them to flourish in the mid 20th century and squelched them again in recent years Readers will learn about the negative impact of union decline on American workers and how that decline has been influenced by political forces They will see how the right to work and Tea Party movements have combined to prevent union organizing to the detriment of the middle class And they will better understand the current failure to reform labor law despite a consensus that unions can protect workers without damaging market efficiencies **Employment Relations in the United States** Raymond L Hogler, 2004 This book presents an overview of the economic political and social forces that shaped contemporary employment relations practices in the United States **Dollars & Sense** , 2003 **Work and Family in America** Leslie Stebbins, 2001-08-13 Surveying current research findings social trends and public controversies Work and Family in America examines the changing cultures of the workplace family and home Once viewed as a women and day care problem work family now encompasses a vast and complex set of issues Eldercare Fatherhood Telecommuting Pay equity Employee productivity and retention Feminism Child care and childcare development Youth violence Welfare Nontraditional families and family values This extensive overview of this burgeoning field includes everything from a detailed history and statistics comparing trends in the United States and abroad to key legislation and legal cases It gives biographical sketches of well known activists like Betty Friedan Arle Hothschild and Rosabeth Moss Kanter Lesser known advocates like James A Levine director of the Fatherhood Project at the Family and Work Institute and MIT professor Lotte Bailyn who believes work should be organized around tasks not time are also included **Women and Austerity** Maria Karamessini, Jill Rubery, 2013-09-11 Austerity has become the new principle for public policy in Europe and the US as the financial crisis of 2008 has been converted into a public debt crisis However current austerity measures risk losing past progress towards gender equality by undermining important employment and social welfare protections and putting gender equality policy onto the back burner This volume constitutes the first attempt

to identify how the economic crisis and the subsequent austerity policies are affecting women in Europe and the US tracing the consequences for gender equality in employment and welfare systems in nine case studies from countries facing the most severe adjustment problems The contributions adopt a common framework to analyse women in recession which takes into account changes in women s position and current austerity conditions The findings demonstrate that in the immediate aftermath of the financial crisis employment gaps between women and men declined but due only to a deterioration in men s employment position rather than any improvements for women Tables are set to be turned by the austerity policies which are already having a more negative impact on demand for female labour and on access to services which support working mothers Women are nevertheless reinforcing their commitment to paid work even at this time of increasing demands on their unpaid domestic labour Future prospects are bleak Current policy is reinforcing the same failed mechanisms that caused the crisis in the first place and is stalling or even reversing the long term growth in social investment in support for care This book makes the case for gender equality to be placed at the centre of any progressive plan for a route out of the crisis
