

Oracle UPK 11 Development

Oracle User Productivity Kit (UPK) is a software application used for developing training material. It excels at the rapid creation of simulations for software applications, but can also be used for creating printed documents such as user procedures and job aids. UPK version 11 pushes UPK's capabilities even further, providing the ability to create user assessment tests, and to facilitate application testing.

UPK makes the creation of simple training material both quick and easy, especially through UPK 11's new Record It! Wizard. However, producing high-quality, fully-functional training simulations and performance support documents requires skill, and a thorough knowledge of the many capabilities of UPK and how to use them.

This book provides UPK authors with a guided approach to UPK's capabilities, and shows how to create high-quality, re-purposable training material to which application users will want to refer again and again. It also provides UPK administrators and power users with details of how to customize UPK's built-in delivery formats to meet an individual project's or client's requirements.

This book will show you how to:

- Record simulations via the Developer or the Record It! Wizard
- Enhance recordings by providing alternative actions and paths, decision frames, explanation frames, and custom text
- Take your simulations beyond mere mouseclicks and keypresses by including conceptual information, glossaries, and role-filtering
- Create questions and assessments to test your users' knowledge
- Use UPK's Test It! mode and test document outputs to facilitate application testing
- Organize your recordings into a functional library for authors, and a publishable outline for users
- Publish your training material to multiple output formats, and customize your recording for each of these
- Integrate your UPK output into training presentations, web sites, embedded help systems and Learning Management Systems
- Customize both UPK's templates and its output formats to meet your individual requirements
