The Early Universe with the VLT Jacqueline Bergeron, 2013-11-11 This is the second ESO workshop in a series dedicated to science opportunities with the VLT. At the first workshop all areas of astronomical research were discussed. This second workshop is dedicated to research projects on the early Universe and has provided a forum for discussing strategies for studying faint distant objects in the optical and infrared spectral regions. This field is evolving very rapidly. There are several new surveys of galaxies and clusters of galaxies at intermediate redshift and quasars at very high redshift. Major advances in the morphological studies of distant galaxies, surveys of galaxies at high redshift and searches for primeval galaxies have been rendered possible by the new facilities provided by the Hubble Space Telescope and the Keck Telescope. Observational constraints on the evolution and formation of galaxies and large scale structures as well as the cosmic chemical evolution were critically discussed with regard to theory and numerical simulations. In this context the VLT first generation instrument capabilities were presented comprehensively and their use as cosmological tools discussed. The concluding remarks of the workshop focussed on the analysis of various possibilities for the VLT second generation instrumentation. Many of these topics were covered by invited reviews and talks as well as some contributed talks. They are included in this volume together with the poster papers.

Handbook of Chemical and Biological Warfare Agents D. Hank Ellison, 2010-12-12 With terrorist groups expanding their weapons of destruction beyond bombs and bullets, chemical and biological warfare agents are not merely limited to the battlefield anymore. In some cases they are now being used on a new front: major metropolitan cities. And in the Handbook of Chemical and Biological Warfare Agents, emergency response personnel from HazMat and Police SWAT teams to Explosive Ordnance Disposal units will find a myriad of information on how to deal with such incidents involving dangerous chemical and biological agents. The 504 page book is formatted into a series of indices developed to facilitate rapid access to key information on chemical, biological, and toxin agents, with each index cross-referenced to all others. The wealth of data not only includes the physical appearance, odor, signs, and symptoms of dangerous materials such as nerve agents and vesicants, but the detection and removal of such agents and the treatment of victims. Author D. Hank Ellison, a former U.S. Environmental Protection Agency emergency responder and officer in the Chemical Corps, who provides chemical and biological counterterrorism training to HazMat, Police SWAT, and Explosive Ordnance Disposal teams, also includes a litany of guidelines from such sources as the US Army, DOT, and other agencies.

Handbook of Chemical and Biological Warfare Agents, Volume 1 D. Hank Ellison, 2022-12-09 The Handbook of Chemical and Biological Warfare Agents, Volume 1: Military Chemical and Toxic Industrial Agents, Third Edition, provides rapid access to key data to response professionals and decision makers on a broad range of agents and pathogens. This volume examines military chemical agents that were developed for their lethal effects and includes chapters on nerve agents.

vesicants urticants convulsants blood agents and pulmonary agents It also details toxic industrial materials that are considered potential threat for use as improvised agents In addition to a discussion of each of these classes of agents coverage includes detailed information on a broad spectrum of individual agents that have been used on the battlefield stockpiled as weapons used or threatened to be used by terrorists or have been otherwise assessed by qualified law enforcement and response organizations and determined to be agents of significant concern The information presented in this edition has been updated and expanded containing more information on toxicology health effects chemical and physical properties of individual agents as well as protective actions needed at the scene of an incident Key Features Focuses on key information needed during an emergency response Provides updated toxicology exposure hazards physical chemical data and best practices with regard to the treatment of casualties Presents updated protective action distances decontamination and remediation information All data compiled is gathered from numerous sources and arranged into the current easy to access format In order to ensure accuracy all data has been cross checked over the widest variety of military scientific and medical sources available

The Handbook of Chemical and Biological Warfare Agents Volume 1 Military Chemical and Toxic Industrial Agents Third Edition remains the gold standard reference detailing the widest variety of military scientific and medical sources available
