Getting to the Common Core Sharon L. Spencer, Sandra Vavra, 2015-01-01 The Common Core Standards have recently been adopted in most states across the nation and teachers are in the process of getting to the core of these standards Teaching to standards is not a new concept teachers have adapted to new standards every few years for quite some time And teachers are adaptable as can be seen in this book We are writing this book to demonstrate how teachers use research based strategies to meet Common Core Standards while still focusing on students Our goal is to help teachers visualize students in action as other teachers describe the implementation of research based strategies in their own classrooms show student work samples and provide reflections of student success in achieving the standards Many Common Core Standards books

focus on the standards but our approach focuses on strategies that engage the students in the classroom showing how different teachers at varying grade levels have used the strategies to meet the standards With this focus we believe that teachers gain a new and positive perspective on approaching the new standards and see the flexibility of strategies for meeting standards across subject areas We have examined research on the strategies with the purpose of giving teachers a brief description of why these strategies work before giving actual examples from classrooms We also work closely with teachers in the public schools and have our finger on the pulse of what is happening in the public schools one of the current stressors being unpacking the Common Core Standards This book actually focuses on practice We begin by laying out a rationale in our first chapter The Core Value s of Education Then each chapter focuses on a strategy including 1 a brief description about the research supporting each strategy and 2 several examples from different grade levels which include a description of how the strategy was used student work samples and a reflection on the use of the strategy The research descriptions are fairly short because while we believe professional educators aka teachers in this case should know the research that supports practice we know they are not typically interested in long diatribes about the research Algebra 1, Noteables: Interactive Study Notebook with Foldables McGraw Hill,2007-04-03 Noteables™ Interactive Study Notebook with Foldables™ is a complete note taking system with guided note taking for every lesson in a workbook format Plus vocabulary builder and a chapter test preparation section are included for every chapter Strategies for Writing in the Social Studies Classroom Kathleen Kopp,2013 In *Strategies for Writing in the Social Studies Classroom* award winning author and veteran educator Kathleen Kopp offers simple and practical writing strategies that any social studies teacher can integrate into every phase of the learning process Writing is a valuable learning tool that can quite effectively and easily help students learn and understand social studies content Teaching it however can be challenging for content area teachers now under pressure from the Common Core Standards refocused attention on reading and writing With step by step directions rubrics student examples templates technology tips and ideas for differentiation Kopp goes beyond journals or reports to show how social studies teachers can use writing to develop critical thinking skills improve understanding of social studies concepts assess students progress and hone skills in content area writing Her writing strategies support the Common Core Standards and because the focus is on applying writing skills and not teaching writing as an end in itself social studies teachers can easily incorporate these strategies in any unit of study This comprehensive resource makes it easy to incorporate writing in your social studies class today and every day *Strategies for Teaching Mathematics* Deborah V. Mink,Linda H.,Janis K.
