**Creativity and the Agile Mind** Tony Veale, Kurt Feytaerts, Charles Forceville, 2013-05-28 Creativity is a highly prized quality in any modern endeavor whether artistic scientific or professional. Though a much studied subject and the topic of a great many case studies the field of creativity research is still very much an open one. Creativity remains a field where absolute definitions hold very little water and where true insight can only emerge when we properly appreciate from a nuanced multi-disciplinary perspective the crucial distinction between the producer's perspective and the consumer's perspective. Theories that afford us a critical appreciation of a creative work do not similarly

afford a explanatory insight into the origins and development of the work As researchers we must approach creativity both as producers to consider the vast search spaces that a producer encounters and to appreciate the need for heuristic strategies for negotiating this space and as consumers to appreciate the levels of shared knowledge foreground and background that is exploited by the producer to achieve a knowingly creative effect in the mind of the consumer This volume thus brings together both producers and consumers in a cross disciplinary exploration of this complex many faceted phenomenon
