Austin Sarat, 2024-05-31 This volume presents essays evaluating the similarities and differences between the legal political ethical and practical landscapes confronted by the death penalty abolition movement at the time of the Furman v Georgia decision and subsequent reversal and those confronted by the same movement today      The Strange Death of Moral Britain Christie Davies, In the last half of the twentieth century a once respectable and religious Britain became a seriously violent and dishonest society one in which person and property were at risk family breakdown was ubiquitous and drug and alcohol abuse was rising The Strange Death of Moral Britain demonstrates in detail the roots of Britain's decline It also shows how a society strongly Protestant in both morality and identity became one of the most secular societies in the world The culture wars about abortion capital punishment and homosexuality which have convulsed the United States have little meaning in Britain where there is neither a moral majority nor any indigenous emphasis on rights In the period when Britain had a strong national and religious identity defense of this identity led to legal persecution of male homosexuals As Britain's identity crumbled homosexuality ceased to be an important issue for most people Similarly all the pressing questions on abortion capital punishment and homosexuality were settled permanently on a purely utilitarian basis in Britain where all sources of moral argument are weak The ending of the death penalty marked the decline of the influence of the official hierarchies of church and state the Church of England the armed forces and their representative the Conservative Party The Strange Death of Moral Britain is a study of moral change secularization loss of identity and the growth of deviant behavior in Britain in the twentieth century Based on detailed scholarship it is tightly argued and clearly written with a minimum of jargon It will be of interest to scholars in religious studies and British social history and to a general reading public concerned with timely moral controversies Christie Davies was for eighteen years a professor at the University of Reading England and has been a visiting lecturer in the United States and India He is the author of several books including The Mirth of Nations available from Transaction and his articles have appeared in leading academic journals in sociology criminology social history and religious studies among others      A History of England from the Earliest Times to the Death of Queen Victoria Benjamin Stites Terry, 1901      **A History of England from the Earliest Times to the Death of Queen Victoria** Benjamin Terry, 1902      Michael Balcon Laurence Kardish, Museum of Modern Art (New York, N.Y.), 1984      **History of England from the Fall of Wolsey to the Death of Elizabeth** James Anthony Froude, 1866      Kalamazoo City Directories , 1899      *Exile and Embrace* Anthony Santoro, 2013-07-09 With passion and precision Exile and Embrace examines the key elements of the religious debates over capital punishment and shows how they reflect the values and self understandings of contemporary Americans Santoro demonstrates that capital punishment has relatively little to do with the perpetrators and much more to do with those who would impose the punishment Because of this he convincingly argues we should focus our attention not on the perpetrators

and victims as is typically the case in debates pro and con about the death penalty but on ourselves and on the mechanisms that we use to impose or oppose the death penalty An important book that will appeal to those involved in the death penalty debate and to general religious studies and American studies scholars as well     **A Complete Word and Phrase**
