South African Defence Force Application For 2015

**Christian Bueger, Timothy
Edmunds, Robert McCabe**

South African Defence Force Application For 2015:

South Africa's Post-Apartheid Military Lindy Heineken, 2020-01-01 This timely book examines how the South African National Defence Force has adapted to the country's new security political and social environment since 1994. In South Africa's changed political state, how has civilian control of the military been implemented and what does this mean for defence in a democracy? This book presents an overview of the security environment, how the mission focus of the military has changed and the implications for force procurement, force preparation, force employment and force sustainability. The author addresses other issues such as the effect of integrating former revolutionary soldiers into a professional armed force, the effect of affirmative action on meritocracy, recruitment and retention, military veterans looking at the difficulties they face in reintegrating back into society and finding gainful employment, gender equality and mainstreaming the rise of military unions and why a confrontational instead of a more corporatist approach to labour relations has emerged. HIV/AIDS and the consequences this holds for the military in terms of its operational effectiveness. In closing, the author highlights key events that have caused the SANDF to become lost in transition and transformation, spelling out some lessons learned. The conclusions she draws are pertinent for the future of defence security and civil-military relations of countries around the world.

Guns & Roses: Comparative Civil-Military Relations in the Changing Security Environment Steven Ratuva, Radomir Compel, Sergio Aguilar, 2019-01-04 This edited volume provides a critical and comparative discussion of the changing synergy between the military and society in the dramatically transforming global security climate, drawing on examples from the Asian Pacific, African, Middle Eastern, European and South American regions. The book is interdisciplinary and covers wide-ranging issues relating to civil-military relations, democratization, regional security, ethnicity, peace building and peace keeping, civilian oversight, internal repression, gender, regime change and civil society.

Military Strategy in an Era of Unipolar Demise Håkan Edström, Jacob Westberg, 2024-11-15 This book presents a systematic comparison of the military strategies pursued by five great powers, eight major middle powers and eight middle powers during the early twenty-first century. In addition to mapping the strategic priorities of these states, the study develops and applies a theoretical framework to explain differences and similarities in their strategic priorities. Moreover, the work evaluates how the stability of the present international system and the US-led liberal international order (LIO) is affected by the strategies pursued by the US and other leading states. The book aims to contribute to previous research in three ways. First, it intervenes in the debate on the stability of the unipolar system and the US-led international order by offering a theoretical framework and an empirical approach for exploring and explaining the strategic priorities and defence strategies of different categories of states. Second, it aims to fill a void in research on strategy, the lack of a comparative and systematic approach to contemporary strategy that facilitates and guides systematic comparisons and analyses of the alignment and military strategies pursued by both major powers and less powerful states. Third, it provides an empirical contribution to the debate on the stability of the unipolar

system and the US led international order by presenting a documentation of the strategic priorities of 21 states based on primary sources consisting of official documents such as national security and defence strategies and defence bills In the conclusion the authors summarise the empirical findings on the system level the regional level and the unit level and present their overarching conclusions for the whole project This book will be of much interest to students of military and strategic studies defence studies foreign policy and international relations in general *The Value of Shame* Elisabeth

War of Intervention in Angola Volume 3 covers the air warfare during the II Angolan War fought 1975 1992 through narrating the emergence and operational history of the Angolan Air Force and Air Defence Force FAPA DAA as told by Angolan and Cuban sources Most accounts of this conflict better known in the West as the Border War or the Bush War as named by its South African participants tend to find the operations by the FAPA DAA barely worth mentioning A handful of published histories mention two of its MiG 21s claimed as shot down by Dassault Mirage F 1 interceptors of the South African Air Force SAAF in 1981 and 1982 and at least something about the activities of its MiG 23 interceptors during the battles of the 1987 1988 period On the contrary the story told by Angolan and Cuban sources not only reveals an entirely different image of the air war over Angola of the 1980s indeed it reveals to what degree this conflict was dictated by the availability or the lack of air power and shows that precisely this issue dictated the way that the commanders of the Cuban contingents deployed to the country whether as advisors or as combat troops planned and conducted their operations It is thus little surprising that the first contingent of Cuban troops deployed to Angola during Operation Carlota in late 1975 included a sizeable group of pilots and ground personnel who subsequently helped build up the FAPA DAA from virtually nothing They continued that work over the following 14 years sometimes in cooperation of Soviet advisors and others from East European countries eventually establishing an air force that by 1988 maintained what South African military intelligence and the media subsequently described as the most advanced air defense system in Africa Not only the air defense system in question but also the aircraft serving as its extended arms ultimately managed a unique feat in

contemporary military history they enabled an air force equipped with Soviet made aircraft and trained along the Soviet doctrine to establish at least a semblance of aerial superiority over an air force equipped with Western made aircraft and operating under a Western doctrine Based on extensive research with help of Angolan and Cuban sources the War of Intervention in Angola Volume 3 traces the military build up of the FAPA DAA in the period 1975 1992 its capabilities and its intentions Moreover it provides a unique blow by blow account of its combat operations and experiences The volume is illustrated with 100 rare photographs half a dozen maps and 15 color profiles thus providing a unique source of reference on this topic **Drones in the African Battlespaces** Wayne Stephen Coetzee, Dries Putter, 2025-08-03 This book a

collaborative endeavour by experts from various disciplines meticulously investigates the increasing reliance on drones in conflicts across Africa delving into their geopolitical tactical and ethical ramifications By emphasising African perspectives it examines the distinct dynamics of the region highlighting the interactions between state actors non state actors and external powers The contributions explore the proliferation of armed and unarmed drones and their deployment by violent non state actors alongside the rise of indigenous drone manufacturing Topics include counterterrorism sovereignty and regional stability The analysis is enriched with in depth case studies offering a nuanced understanding of the tactical operational and strategic implications of drones in African battlespaces The book underscores the potential of drones to address Africa's unique security challenges such as irregular warfare and porous borders while also raising ethical concerns related to surveillance civilian casualties and dual use technologies Drones in the African battlespaces provide a timely comprehensive examination of how unmanned systems are reshaping warfare and security across the continent inviting policymakers researchers and practitioners to critically engage with the implications of this technological shift for Africa's future The Routledge Handbook of Transformative Global Studies S.
