Revisiting Integrated Water Resources Management Cecilia Tortajada, 2017-10-02 The book includes seventeen excellent researched and documented papers that reflect the diversity of thought ideas and experiences related to IWRM. They draw from an extensive inclusive and geographically representative range of theoretical propositions and practical examples. These include the implementation status of the IWRM concept at local basin, regional and national levels; its appropriateness for the twenty-first century; main implementation gaps from the institutional, legal, policy, governance, management and technical viewpoints; the likelihood that IWRM's entrenchment in laws, regulations and policies has led to smoother implementation; and the reasons why that has been the case. Reflexions on whether the attention given to IWRM is pushing other alternatives to the policy periphery and the new conceptual constructions that can be put forward for discussion in the international arena. For the development and water communities, it is imperative to debate and reach towards more illustrative conclusions regarding whether the promotion of the IWRM concept and its actual implementation status have been beneficial for development and how the notion could evolve to achieve this end. In-depth, objective and constructive discussions, arguments, proposals and ideas are put forward for analysis by all interested parties. The book has the objective of fostering scholarly exchange, encouraging intellectual debate and promoting the advancement of knowledge and understanding of IWRM as a concept, as a goal per se and as a strategy towards development goals. This book was published as a special issue of the *International Journal of Water Resources Development*. *Handbook of Active Ageing and Quality of Life* Fermina Rojo-Pérez, Gloria Fernández-Mayoralas, 2021-04-12 This handbook presents an overview of studies on the relationship of active ageing and quality of life. It addresses the new challenges of ageing from the paradigm of positive ageing: active, healthy and successful for a better quality of life. It provides theoretical perspectives and empirical studies including scientific knowledge as well as practical experiences about the good ageing and the quality of later life around the world in order to respond to the challenges of an aged population. The handbook is structured in 4 sections covering theoretical and conceptual perspectives, social policy issues and research agenda, methods, measurement, instrument scales and evaluations, and lastly application studies including domains and geographical contexts. Chapter 5 is available open access under a Creative Commons Attribution 4.0 International License via link [springer.com/div](https://www.springer.com/div). Midwifery Sally Pairman, Sally K. Tracy, Carol Thorogood, Jan Pincombe, 2010 *Midwifery: Preparation for Practice 2e* is the only text which reflects the historical and socio-political environment in which midwives in Australia and New Zealand practice. In addition, it is the only text which incorporates the philosophy and standards endorsed by New Zealand and Australian Colleges of Midwives while also focusing on the partnership between midwives with women and the woman-centred model of midwifery care. The second edition has built on the existing philosophy and structure of *Midwifery: Preparation for Practice* though with a greater emphasis on the development of critical thinking and researching skills. Key chapters have been re-written to reflect recent changes in government legislation while current research and pertinent examples are included throughout the text. This new

edition is supported by a comprehensive suite of resources for both Instructors and Students using the Evolve website as a platform. These ancillaries will re-enforce the critical thinking elements for students with interactive case studies and scenario based learning exercises as well as the multiple choice questions.
