

Pressure Switches for Process Applications

General Instructions

NN

These instructions provide information for electrical connection, installation, process connection, and calibration. If the switch is a pivot seal sensor type (piston 2 or 3), it is recommended for high-pressure fluid power applications where high-shock pressure and high-cycle rates are expected. Pivot seal sensors are designed specifically for those applications.

NOTE: If you suspect that a product is defective, contact the factory or the SOR® Representative in your area for a return authorization number (RMA). This product should only be installed by trained and competent personnel.

Electrical Connection

Electrical Power must be disconnected from explosion-proof models before the cover is removed. Failure to do so could result in severe personal injury or substantial plant damage.

Storing excess wire or making wire lead splices inside the pressure switch housing will interfere with pressure switch operation.
